historically and culturally the societies that produced still life painting could hardly be more diverse what is it then that allows us to place such different types of image in a single category norman bryson argues that the family resemblances between the different types of still life stem from their common portrayal of a level of material culture that retains its fundamental outlines through long spans of time and across the boundaries and divisions of national culture the culture of domestic routine and the rituals of hospitality how this low plane reality is historically viewed and inflected by the higher levels and discourses of the surrounding culture is the fundamental subject of this book

from a master of american letters and the author of the acclaimed rabbit series comes a richly illustrated book of eighteen insightful essays about american art written while he was the art critic at the new york review of books remarkably elegant little essays dense in thought and perception but offhandedly casual in style their brevity makes more acute the sense of regret one feels to see them end newday when in 1989 a collection of john updike s writings on art appeared under the title just looking a reviewer in the san francisco chronicle commented he refreshes for us the sense of prose opportunity that makes art a sustaining subject to people who write about it in the sixteen years since just looking was published he continued to serve as an art critic mostly for the new york review of books and from fifty or so articles has selected for this book eighteen that deal with american art after beginning with early american portraits landscapes and the transatlantic career of john singleton copley still looking then considers the curious case of martin johnson heade and extols two late nineteenth century masters winslow homer and thomas eakins next it discusses the eccentric pre moderns james mcneill whistler and albert pinkham ryder the competing american impressionists and realists in the early twentieth century and such now historic avant garde figures as alfred stieglitz marsden hartley arthur dove and elie nadelman two appreciations of edward hopper and appraisals of jackson pollock and andy warhol round out the volume america speaks through its artists as updike states in his introduction the dots can be connected from copley to pollock the same tense engagement with materials the same demand for a morality of representation can be discerned in both

Essays on Actions and Events 2001-09-27

donald davidson has prepared a new edition of his classic 1980 collection of essays on actions and events including two additional essays in this seminal investigation

of the nature of human action davidson argues for an ontology which includes events along with persons and other objects certain events are identified and explained as actions when they are viewed as caused and rationalized by reasons these same events when described in physical biological or physiological terms may be explained by appeal to natural laws the mental and the physical thus constitute irreducibly discrete ways of explaining and understanding events and their causal relations among the topics discussed are freedom to act weakness of the will the logical form of talk about actions intentions and causality the logic of practical reasoning hume s theory of the indirect passions and the nature and limits of decision theory the introduction cross references and appendices emphasize the relations between the essays and explain how davidson s views have developed

The Decay of Lying 2020-11-27

the decay of lying an observation by oscar wilde the decay of lying an observation is an essay by oscar wilde included in his collection of essays titled intentions published in 1891 this is a significantly revised version of the article that first appeared in the january 1889 issue of the nineteenth century wilde presents the essay in a socratic dialogue between vivian and cyril two characters named after his own sons their conversation though playful and whimsical promotes wilde s view of romanticism over realism vivian tells cyril of an article he has been writing called the decay of lying a protest according to vivian the decay of lying as an art a science and a social pleasure is responsible for the decline of modern literature which is excessively concerned with the representation of facts and social reality he writes if something cannot be done to check or at least to modify our monstrous worship of facts art will become sterile and beauty will pass away from the land moreover vivian defends the idea that life imitates art far more than vice versa nature he argues is no less an imitation of art than life vivian also contends that art is never representative of a time or place rather the highest art rejects the burden of the human spirit she develops purely on her own lines she is not symbolic of any age vivian thus defends aestheticism and the concept of art for art s sake at cyril s behest vivian briefly summarizes the doctrines of the new aesthetics in the following terms art never expresses anything but itself all bad art comes from returning to life and nature and elevating them into ideals life imitates art far more than art imitates life it follows as a corollary that external nature also imitates art lying the telling of beautiful untrue things is the proper aim of art the

essay ends with the two characters going outside as Cyril asked Vivian to do at the beginning of the essay Vivian finally complies saying that Twilight Nature's chief use may be to illustrate quotations from the poets as Michèle Mendelssohn points out in an era when sociology was still in its infancy psychology wasn't yet a discipline and theories of performativity were still a long way off Wilde's essay touched on a profound truth about human behaviour in social situations the laws of etiquette governing polite society were in fact a mask tact was merely an elaborate art of impression management

is paris still the capital of the nineteenth century the question that guides this volume stems from walter benjamin s studies of nineteenth century parisian culture as the apex of capitalist aesthetics thirteen scholars test benjamin s ideas about the centrality of paris formulated in the 1930s from a variety of methodological perspectives many investigate the underpinnings of the french capital s reputation and mythic force which was based largely upon the city s capacity to put itself on display some of the authors reassess the famed centrality of paris from the vantage point of our globalized twenty first century by acknowledging its entanglements with south africa turkey japan and the united states the volume equally studies a broader range of media than benjamin did himself from modernist painting and printmaking photography and illustration to urban planning the essays conclude that paris did in many ways function as the epicenter of modernity s international reach especially in the years from 1850 to 1900 but did so only as a consequence of the idiosyncratic force of its mythic image above all the essays affirm that the study of late nineteenth century paris still requires nimble and innovative approaches commensurate with its legend and global aura
