Structural Drafting 1920 designed so that professionals can create the structural calculation package and the detailing as quickly and economically as possible contains 239 representative drawings each one on a separate page that includes a description a checklist summarizing the detail and a small plan view which suggests the location on the structural drawing where the detail can be applied an accompanying disk in cad format allows users to import the details and customize them to their needs in addition every drawing is saved in a separate file in dxf format that can be loaded into most cad software programs and modified plotted or printed as needed

Structural Steel Drafting and Elementary Design 1915 this highly illustrated manual provides practical guidance on structural steelwork detailing it describes the common structural shapes in use and how they are joined to form members and complete structures explains detailing practice and conventions provides detailing data for standard sections bolts and welds emphasises the importance of tolerances in order to achieve proper site fit up discusses the important link between good detailing and construction costs examples of structures include single and multi storey buildings towers and bridges the detailing shown will be suitable in principle for fabrication and erection in many countries and the sizes shown will act as a guide to preliminary design the third edition has been revised to take account of the new eurocodes on structural steel work together with their national annexes the new edition also takes account of developments in 3 d modelling techniques and it includes more cad standard library details
