The Papers of Thomas Jefferson, Volume 16

2012-08-06

in a number of academic disciplines auto biography and auto ethnography have become central means of critiquing of the ways in which research represents individuals and their cultures auto biography and auto ethnography are genres that blend ethnographic interests with life writing and they tell about a culture at the same time they tell about an individual life this book presents educational researchers in exemplary form the possibilities and constraints of both auto biography and auto ethnography as methods of doing educational research the contributors to this volume explore by means of examples auto biography and auto ethnography as means for critical analysis and as tool kit for the different stakeholders in education the four thematic sections deal with a different possible uses and constraints of the two methods b understanding teaching and teaching to learn c institutional critiques d experiences and trajectories as evidence of a sociology of everyday life the book was written to be used by upper undergraduate and graduate students taking courses in research design because of its practical approach it is highly suitable for those contexts where research methods courses do not exist the audience also includes professors who want to have a reference on design and methodology and those

1896
the pixel as the organizing principle of all pictures from cave paintings to toy story the great digital convergence of all media types into one universal digital medium occurred with little fanfare at the recent turn of the millennium the bit became the universal medium and the pixel a particular packaging of bits conquered the world henceforward nearly every picture in the world would be composed of pixels cell phone pictures app interfaces mars rover transmissions book illustrations videogames in a biography of the pixel pixar cofounder alvy ray smith argues that the pixel is the organizing principle of most modern media and he presents a few simple but profound ideas that unify the dazzling varieties of digital image making smith s story of the pixel s development begins with fourier waves proceeds through turing machines and ends with the first digital movies from pixar dreamworks and blue sky today almost all the pictures we encounter are digital mediated by the pixel and irretrievably separated from their media museums and kindergartens are two of the last outposts of the analog smith explains engagingly and accessibly how pictures composed of invisible stuff become visible that is how digital pixels convert to analog display elements taking the special case of digital movies to represent all of digital light his term for pictures constructed of pixels and drawing on his decades of work in the field smith approaches
his subject from multiple angles art technology entertainment business and history a biography of the pixel is essential reading for anyone who has watched a video on a cell phone played a videogame or
seen a movie 400 pages of annotations prepared by the author and available online provide an
