book in the form of examples and case studies from the author's own design and consulting work as well as interviews with other designers using InDesign on the job. Skill-based teaching and hands-on exercises although the book has a comprehensive glossary page one begins right away speaking to the core market: print professionals in industry terms about industry challenges. This immediately lets experienced InDesign users know the book is about them. The approach is humorous, making the digestion and retention of complicated information easier for the reader through quips, anecdotes, and design and print geek humor. But at all times the book is true to its mission: helping a professional do their job in InDesign without frustration, confusion, or aesthetic compromise.

How does one culture read another in literature and religion? Two scholars, one from China and one from the West, each read texts from the other's culture as a means of dialogue. A key issue in such an enterprise is the nature of religion and what we understand by that term in a world in which ancient religious customs seem to be dying or under threat. Does a comparative study of religious literature offer a way towards mutual understanding or merely illustrate our differences underpinned by their own friendship? These two partners in conversation show what is possible.
