## **National Secession**

2018-10-15

how do some national secessionist campaigns get on the global agenda whereas others do not which projects for new nation states philip roeder asks give rise to mayhem in the politics of existing states national secession has been explained by reference to identities grievances greed and opportunities with the strategic constraints most national secession campaigns face the author argues the essential element is the campaign s ability to coordinate expectations within a population on a common goal so that independence looks like the only viable option roeder shows how in most well known national secession campaigns this strategy of programmatic coordination has led breakaway leaders to assume the critical task of propagating

an authentic and realistic nation state project such campaigns are most likely to draw attention in the capitals of the great powers that control admission to the international community to bring the campaigns disputes with their central governments to deadlock and to engage in protracted intense struggles to convince the international community that independence is the only viable option in national secession roeder focuses on the goals of national secession campaigns as a key determinant of strategy operational objectives and tactics he shifts the focus in the study of secessionist civil wars from tactics such as violence to the larger substantive disputes within which these tactics are chosen and he analyzes the consequences of programmatic coordination for getting on the global agenda all of which he argues can give rise to intractable disputes and violent conflicts

## **The Victorians and Edwardians at War**

2012-09-20

in a connected metropolis maxwell johnson describes los angeles s rise in the early twentieth century as catalyzed by a series of upper class debates about the city s connections to the outside world by focusing on specific moments in the city s development when tensions over los angeles s connections or lack thereof emerged johnson ties each movement to two or three contemporary figures who influenced the debates at hand the elites previous efforts to secure nationwide and global connections for los angeles were wildly successful following world war ii as a result the city became a landing spot for african american migrants cambodian and laotian refugees and mexican and central american immigrants johnson argues that the city s history is more defined by external relationships than previously understood and those relationships have given the history of the city more continuity than originally recognized at the turn of the twentieth century the politics of connection revolved around initiatives to tie los angeles to other places both tangibly and metaphorically elites built tangible connections to secure among other things the water that irrigated the citrus farms of los angeles the capital that propelled its businesses and the people who migrated from the midwest to buy its houses to build metaphorical connections that located the city amid transcontinental and trans pacific movements elites themselves often transcended nearby borders and pursued connections at will los angeles stood as a focal point for elite ambitions a place with a more ambivalent relationship to external connections the true story of los angeles s rise lies in the spectacular visions and rambunctious activism of a group of elite men dedicated to transforming a remote frontier town into a global metropolis
