now in its fifth edition this best selling multidisciplinary textbook continues to draw on the skills of pharmacists and clinicians to present optimal drug regimens the authors integrate an understanding of the disease processes with an appreciation of pathophysiological processes clinical pharmacy and the evidence base new to this edition stronger emphasis on understanding both the prescribing process and the clinical pharmacy process all chapters completely revised and updated thirty eight leading new authors features key points boxes at the beginning of every chapter case study tests at the end of every chapter chapters co authored by pharmacists and clinicians organised by body system consistent clearly signposted chapter layout a unique and valuable support for all those involved or interested in drug therapy this is a textbook that no university or pharmacy department particularly those with employees studying at any level and no pharmacist trying to develop their knowledge base should be without dr chris green and john sexton the pharmaceutical journal now in its fifth edition this best selling multidisciplinary textbook continues to draw on the skills of pharmacists and clinicians to present optimal drug regimens the authors integrate an understanding of the disease processes with an appreciation of pathophysiological processes clinical pharmacy and the evidence base new to this edition stronger emphasis on understanding both the prescribing process and the clinical pharmacy process all chapters completely revised and updated thirty eight leading new authors features key points boxes at the beginning of every chapter case study tests at the end of every chapter chapters co authored by pharmacists and clinicians organised by body system consistent clearly signposted chapter layout a unique and valuable support for all those involved or interested in drug therapy this is a textbook that no university or pharmacy department particularly those with employees studying at any level and no pharmacist trying to develop their knowledge base should be without dr chris green and john sexton the pharmaceutical journal stronger emphasis on understanding both the prescribing process and the clinical pharmacy process all chapters completely revised and updated thirty eight leading new authors

Undesirable Drug Interactions

1974

over the past 25 years the world s population has witnessed an explosion in kno edge about infectious diseases the global population is coming to the realization that diseases long

recognized to cause substantial suffering such as malaria tuberculosis schistosomiasis and hepatitis can be diagnosed and treated and that transmission can be prevented using tools that are available and which may be becoming increasingly affordable the global population is recognizing that few infections are local the travel of humans other animals insects and food transport pathogens around the world often with astonishing rapidity new pathogens are appearing either newly recognized or newly developing such as severe acute respiratory syndrome sars avian inf enza metapneumovirus or hepatitis c which are causing human morbidity and mortality finally there is growing fear that dangerous pathogens may be intentionally introduced into human populations by deranged individuals or terrorist organizations the potential to use drugs or biologic agents to treat and prevent infectious diseases has increased dramatically over the past quarter century as we have learned more about the biology of many of these agents and as we have developed techniques to discover new agents by high throughput screening programs and by sophisticated drug design and synthesis

Stockley's Drug Interactions

2010

learning to prescribe is an essential part of medical training due to various high profile serious prescribing errors the gmc have introduced stricter prescribing standards which medical students must meet in order to graduate this book helps medical students learn the essentials of safe prescribing practice and is aimed directly at their needs it covers all the aspects of prescribing required by the gmc including principles of prescribing law and ethics professional responsibilities patient communication at risk groups avoiding common errors and what to do when things go wrong key features directly linked to the prescribing competencies in the gmc s tomorrow s doctors and good practice in prescribing medicines real life prescribing case studies and scenarios relate the principles to actual practice and placement situations activities throughout each chapter for testing prescribing knowledge and skills test questions for the new prescribing skills assessment to help students prepare and be confident that they can pass
