Why School Anti-Bullying Programs Don't Work 2008-08-15 this book serves as a guide for readers interested in improving school climate using 15 years of consultation and research in a variety of united states and foreign schools the authors strip down the elements needed to create a healthy and productive school climate the book challenges many commonly held notions about violence prevention and outlines a simple and inexpensive formula for creating sustained change in any school the book stresses understanding of the underlying processes involved in the bully victim bystander power dynamics the value of altruism and the use of natural leaders to begin and sustain change in a school climate a note on the book s cover positive vibrations is taken from a bob marley song rastaman vibration positive you can t live that negative way the song rallies people to be positive and strong and to speak honestly and stand up for their rights while taking care of themselves although jamaican in origin it has universal application to be a gentle warrior in one s personal life for the good of self and others

The Impact of an Anti-Bullying Program on the Prevalence of Bullying in Junior and Senior High School 2000-06-18 scope of study this dissertation examines the impact of an anti bullying program on the prevalence of bullying in junior and senior high school three research questions were posed will an anti bullying program reduce the prevalence of bullying in junior grades 7 9 and senior high grades 10 12 school will the program be more effective at the junior or senior high school level are there gender issues related to the effectiveness of the program i e do males or females benefit more from the implementation of the program findings and conclusions data collected and analyzed to address the above questions suggest that the anti bullying program was ineffective in reducing the prevalence of bullying at the junior and senior high school level the treatment group at st bernard s school did not show any statistically significant changes when compared to the control group at jacques fontaine school when grade was analyzed in the treatment group as a factor on the impact of the program in all but one of the questions examined there was little in the way of statistical significance to report in the one question where significance was observed students at the grade 10 12 level reported a lower level of bullying than their grade 7 9 counterparts in addition when gender was examined in the treatment group as a factor on the impact of the anti bullying program no statistical significance was observed thus it would appear the anti bullying program chosen for this study was ineffective in reducing the prevalence of bullying in junior and senior high school students

Evidence-Based Bullying Prevention Programs for Children and Youth 2012-04-17 bullying is a hot topic at schools across the nation chronic involvement in bullying is associated with many intrapersonal interpersonal and academic problems and even sporadic experiences of bullying are harmful during the last two decades several prevention and intervention programs have been developed by research teams all over the world many of these programs have been adopted in the united states this volume introduces five evidence based anti bullying programs developed in european countries where much of the early innovations and adaptations have occurred based on state of the art knowledge this volume answers how can educators detect that bullying is going on in their school how can educators respond competently in acute bullying situations how can educators prevent bullying in their schools in the long run this is the 133rd volume of new directions for youth development the jossey bass quarterly report series dedicated to bringing together everyone concerned with helping young people including scholars practitioners and people from different disciplines and professions
