democracy is today a concept that is overwhelmingly positively evaluated almost everywhere a lot has been written about socio economic and cultural backgrounds of democratic regimes as well as their institutional settings by contrast not much is known about the political manoeuvres and speech acts by which democracy has been tied to particular regions and cultures in concrete historical situations this book discusses a series of efforts to rhetorically produce a particular nordic version of democracy it shows that the rhetorical figure nordic democracy was a product of the age of totalitarianism and the cold war it explores the ways in which nordic democracy was used mainly by the social democrats to provide the welfare politics with cultural and historical legitimacy and foundations thus it also acknowledges the ideological and geopolitical context in which the nordic welfare state was conceptualised and canonised the contributors of the book are specialists on nordic politics and history who share a particular interest in political rhetoric and conceptual history

this book presents a detailed analysis of the educational model in nordic european countries it describes the traditional idea of education for all which can be characterized by the right for every child to have an education of equal quality in a common school for all pupils regardless of social class abilities gender or ethnicity against this

background the nordic education model traces the rise of neo liberal policies that have been enacted by those who believe the school for all ideology does not produce the knowledge and skills that students need to succeed in an increasingly competitive and global marketplace it examines the conflict between these two ideas and shows how neo liberal technologies affect the nordic model in different ways the authors also show how social technologies are being interpreted in different ways in actual school practices this process of translating national regulations into internal sense builds on the values in the culture to which they are introduced in the end this book reveals that a nordic model can constitute a delicate balance between traditional values institutionalized practices and contemporary neo liberal forms of governance and policies it may be argued from a new institutional perspective that the main structures of the nordic educational model will sustain as long as the deeply rooted nordic culture survives in the globalised society
