one learns medicine including pediatrics by first learning a set of rules and then spending the rest of his her productive career discovering exceptions to those rules this book is intended to serve as a study guide for organizing the acquisition of an initial foundation of information about pediatric topics without an initial set of rules all new information is simply another new rule and not an interpretive frame of reference for the deeper level of understanding that occurs with recognition that one is dealing with a change in his previously held belief as such i have attempted to include what i think most would agree are commonly held operational facts of pediatrics and have not tried to justify or substantiate the facts with references or lengthy background information as to why these facts are currently thought to be true my primary intent in writing this book is to provide an adequate core of pediatric information to enable one to pass the pediatric portion of the national boards i hope it will also provide a foundation for those who wish to spend more time discovering why children are different if this study guide fulfills whichever of these needs is yours it will have been successful a eugene osburn acknowledgments i am grateful for the help and support provided by the secretaries phyllis bullock jeannie brown debby williams tiffany schoonover and christy anthony in preparation of this manuscript

Manual of Pediatric Intensive Care 2019-04-01

From its superior illustrations and striking full-color design to its abundant special features, it's easy to see why it's been the #1 pediatric nursing text for over 20 years. It provides readers with the essential information they need to deliver safe and accurate care, divided into two logical parts. The first half of the book focuses on child development and health promotion by age group and lays the foundation for the second half of the book, which addresses specific health problems organized by body systems. Text focuses on the family throughout by emphasizing the role and influence of the family in health and illness. Utilizes the nursing process format to present nursing care for major diseases and disorders. Guidelines boxes throughout the text provide step-by-step instructions for performing specific skills or procedures. Emergency treatment boxes provide quick reference in critical situations. Nursing care plans incorporate patient and family-centered goals and include rationales for nursing interventions. Family home care boxes highlight important information to better prepare families to cope with their child's care in special situations. Disorder sections provide detailed presentations of pathophysiology. Community focus boxes emphasize community issues and provide additional resources for guidance on caring for children outside the clinical setting. Cultural awareness boxes highlight ways in which variations in beliefs and practices affect child care. Atraumatic care boxes provide guidance for administering nursing care with minimal pain or stress to the child, family, and nurse. Evidence-based practice boxes throughout the text focus students' attention on application of both research and critical thought processes to support and guide the outcomes of nursing care. Nursing alerts and nursing tips are highlighted throughout the text to provide the reader with either critical information alerts or helpful hints. Tips CD companion features critical thinking questions, case studies, nursing care plans, assessment tools, new NCLEX examination style review questions, and skills. Critical thinking exercises encourage self-evaluation about clinical judgments. Ethical case studies provide realistic learning experiences. The most current information on immunizations to keep readers up to date. Appendix with Spanish/English translations includes words and phrases commonly used in nurse-parent interactions. A chapter on chronic illness, disability, and end-of-life care provides the necessary content for quality nursing care at the end of life.
