professor zhiping liang offers a new understanding of chinese legal tradition in this profoundly influential book unlike the available literature using the usual method of legal history research this book attempts to illustrate ancient chinese legal tradition through cultural interpretation the author holds that both the concept and practice of law are meaningful cultural symbols the law reveals not only the life pattern in a specific time and space but also the world of the mind of a specific group of people therefore just as cultures have different types laws embedded in different societies and cultures also have different characters and spirits believing that human experience is often condensed into concepts categories and classifications the author begins his discussion with the analysis of relevant terms and then seeks to understand history by interpreting the interaction and interconnectedness of the words ideas and practices based on the same understanding the author uses modern concepts reflectively and critically consciously exploiting the differences between ancient and contemporary chinese and western concepts to achieve a more realistic understanding of history while avoiding the ethnocentrism and modern centrism common in historical studies

within this text the contributors provide a historical perspective on the development of anthropology and sociology since their introduction to chinese thought and education in the early twentieth century with an emphasis on the 1930s and 1980s the authors offer different windows on theoretical and research agendas of anthropologists and sociologists of the prc and taiwan shaped as much by their political context as by disciplinary training in examining the careers of several individual scholars they also make note not only of their creative contributions but also of the resonance of their intellectual concerns with contemporary issues in sociology and anthropology culturalism frontiers women finally the volume is organized loosely around the problem of how to translate these disciplines into a chinese context s the issues of indigenization bentuhua or making chinese zhongguohua which have haunted the two disciplines since their establishment in the 1930s because of the contradictory expectations that they generate this is where the case of china resonates with similar concerns in other societies where the disciplines were imported from abroad as products of a euro american capitalist modernity conflicting with aspirations to create their own localized alternative modernities
