This collection of chapters focuses on the regulation of the British economy in the long eighteenth century as a means to understand the synergies between political, social, and economic change as Britain was transformed into a global power. Inspired by recent research on consumerism and credit, an international team of leading academics examines the ways in which state and society both advanced and responded to fundamental economic changes. The studies embrace all aspects of the regulatory process, from developing ideas on the economy to the passage of legislation and to the negotiation of economic policy and change in practice. They range broadly over Britain and its empire and also consider Britain's exceptionalism through comparative studies. Together, the book challenges the general characterization of the period as a shift from a regulated economy to a more laissez-faire system, highlighting the uncertain relationship between the state and economic interests across the long eighteenth century.

the idea of interculturality being an essential part of a language learner s toolkit is widely accepted less certain is exactly what interculturality is and how to determine who has it who does not have it and importantly how to get it this book is concerned with these questions the work presented here explores the concept of intercultural communicative competence as an aim of foreign language learning it examines in particular the role of student mobility and how short stays abroad affect higher education students perceptions of their development of this complex competence it explores the coinage of the term intercultural communicative competence and the current

debate regarding its definition usage and usefulness the work then moves on to describing an empirical study in which students who are studying english at a german university participate in an eight week short stay abroad to the english speaking world and are asked about their perceived development of intercultural communicative competence and the ways in which their expectations for the stay abroad are met developing intercultural communicative competence is an institutional aim of the stay abroad and therefore the ways the participants make sense of this competence are of interest through case study research and quantitative questionnaires data are gathered analysed and described the study shows that even a short stay abroad helps develop intercultural communicative competence albeit in individually different ways

the aim of this book is to analyze the relationship between renewable energy sources and citizens focusing both on demand and supply today the consequences regarding the use of fossil energy are seen from a different perspective because the issues related to climate change are evident worldwide thus climate change and resource depletion are real problems to be addressed for the welfare of society renewable energy sources res are essential to reduce polluting emissions but they can produce a range of environmental effects which might be detrimental to human activities as attested by the several types of the nimby effect not in my back yard this is because infrastructure siting usually offers different pros and cons to stakeholders and the local populations affected nevertheless empirical evidence shows that in many countries society is willing to pay a significant amount to facilitate adoption of renewable technologies with res citizens are called on to play a dual role not only that of end consumers but often also stakeholders in the local production process in this book we try to deal with this dual role played by the citizens to evaluate the actual public acceptance of res we address a specific and important area of the economic analysis willingness to pay wtp and willingness to accept wta the research evaluates the attitude of citizens towards the end use of green energy by investigating the likelihood of acceptance of a new infrastructures related to res production the book therefore is not about how to reconcile consumers and citizens rather it explores the main determinants of peoples behavior for a better understanding of this phenomenon
