in hard interests soft illusions natasha hamilton hart explores the belief held by foreign policy elites in much of southeast asia indonesia malaysia the philippines thailand singapore and vietnam that the united states is a relatively benign power she argues that this belief is an important factor underpinning u s preeminence in the region because beliefs inform specific foreign policy decisions and form the basis for broad orientations of alignment opposition or nonalignment such foundational beliefs however do not simply reflect objective facts and reasoning processes hamilton hart argues that they are driven by both interests in this case the political and economic interests of ruling groups in southeast asia and illusions hamilton hart shows how the information landscape and standards of professional expertise within the foreign policy communities of southeast asia shape beliefs about the united states these opinions frequently rest on deeply biased understandings of national history that dominate perceptions of the past and underlie strategic assessments of the present and future members of the foreign policy community rarely engage in probabilistic reasoning or effortful knowledge testing strategies this does not mean she emphasizes that the beliefs are insincere or merely instrumental rationalizations rather cognitive and affective biases in the ways humans access and use information mean that interests influence beliefs how they do so depends on available information the social organization and practices of a professional sphere and prevailing standards for generating knowledge

## **Deciphering Southern Thailand's Violence**

since 2004 thailand s southern border provinces have been plagued by violence there are a wide array of explanations for this violence from the revival of malay nationalist movements and the influence from the global trend of radical islam to the power play among the regional underground crime syndicates politicians and state authorities the disparate interpretations signal the dynamic and complex discursive contention of this damaging and enduring conflict and this book looks at how this is played out in the thai media and with what possible consequences in analysing the southern conflict coverage the book presents the deficiencies in news coverage as produced by four news organisations of different natures across a seven year review period and discusses the professional practices that hinder journalism from serving as a fair arena for healthy and rational democratic debates based on in depth interviews with news workers it argues that thai journalism is not always monolithic and static as shown in the discursive shifts in news content the variations of journalistic practices and news workers disparate stances on the conflict the book goes on to highlight the less immediately apparent difficulties of political conflict reporting such as the subtle patterns of intimidation and media manipulation as well as the challenges of countering socially prevailing hegemonic beliefs in thai society exploring the political contingencies and socio cultural influences at play this book provides an in depth study of journalism s role in politics in thailand and is of interest to students and scholars of southeast asian politics media studies and peace and conflict studies

from the national book award winning author of redeployment and missionaries an astonishing fever graph of the effects of twenty years of war in a brutally divided america when phil klay left the marines a decade ago after serving as an officer in iraq he found himself a part of the community of veterans who have no choice but to grapple with the meaning of their wartime experiences for themselves and for the country american identity has always been bound up in war from the revolutionary war of our founding to the civil war that ended slavery to the two world wars that launched america as a superpower what did the current wars say about who we are as a country and how should we respond as citizens unlike in previous eras of war relatively few americans have had to do any real grappling with the endless invisible conflicts of the post 9 11 world in fact increasingly few people are even aware they are still going on it is as if these wars are a dark star with a strong gravitational force that draws a relatively small number of soldiers and their families into its orbit while remaining inconspicuous to most other americans in the meantime the consequences of american military action abroad may be out of sight and out of mind but they are very real indeed this chasm between the military and the civilian in american life and the moral blind spot it has created is one of the great themes of uncertain ground phil klay s powerful series of reckonings with

some of our country's thorniest concerns written in essay form over the past ten years in the name of what do we ask young americans to kill and to die in the name of what does this country hang together as we see at every turn in these pages those two questions have a great deal to do with each another and how we answer them will go a long way toward deciding where our troubled country goes from here
