W.D. Gann's justly famous work on the trading of commodities is a writing of this book to supply a universal demand and give rules that will forecast the trend of commodities conditions have changed rapidly during the last few years and will change more rapidly after this great war is over than ever before in history men will return to the soil of mother nature to make a living investors and speculators will have to look for new ways to make money in the future and will find it more difficult in the stock market therefore the necessities of life the basic commodities will offer greater opportunities than investments in stocks and bonds providing the trader knows the rules to follow my object is to write something that will be helpful to people in trade lines and to those who have long years of experience in the commodity market as well as the inexperienced trader who wants knowledge and needs to learn the ways to start right and to protect his capital and make profits life affords no greater pleasure than that of helping others who are trying to help themselves I am going to give the best of my forty years of experience in this book and I hope to show others the way to help themselves and follow mathematical rules in the commodity market which will result in profits I do not believe in gambling or reckless speculation but am firmly convinced after years of experience that if traders will follow rules and trade on definite indications that speculation can be made a profitable profession trading in commodities is not a gambling business as some people think but a practical safe business when conducted on business principles I offer this book to the public with a sincere conviction that if they put in the time studying they will derive great benefits

we all have the same goal when we make an investment maximizing profits while limiting losses the goal of this book is to help novice and beginning traders to understand the markets and to explore ways of maximizing profits while limiting losses while trading the stock market the novice trader has more questions than they even know they have maybe they know about limit orders but not stop limits or the bid or the ask this is why this book tries to begin at the beginning and quickly explain the important aspects while not getting bogged down in too much needless detail analogies and clear examples are used throughout the book to help to explain the different topics and critical charting interactions that can seem random at first but tend to follow certain patterns with over 100 graphics pulled from real world charts used as examples including a technical analysis of the chart you can follow many company stocks and see how the technical predictions developed in the months and years since the book was written if you have wondered how the stock market works and how you can trade profitably with a less risk of losing your money then congratulations today you have begun your journey of discovery that can lead to a literal pot of gold at the end of a ticker tape rainbow is it an easy journey no it isn't easy but it is not impossible either and who ever heard of a pot of gold that is easy to gain access to trading stocks is not for the faint hearted or mentally lazy and those with poor discipline will have even more to learn than will the natural zen master however with practice even the worst trader can learn to fix their mistakes and capitalize on their own strengths by noting entry and exit points and reasons for making each trade you can analyze your good trades and also any mistakes we learn more from our mistakes than our successes never fear failure learn from the attempt and note the results and then incorporate the lessons learned in the next attempt you will see how you can develop your own trading strategy using the zero risk method of online trading games or paper trading even an experienced trader should use practice trading when trying a new strategy or trade setup until they can regularly trade it for gains once a repeatable setup has been successfully traded profitably by using an online trading game or simulator multiple times then you can look to trade that same setup with a small real money position when it next appears when first trading with actual money it is best to trade only a small position until you can limit losses and make consistent gains only when you can limit losses and make consistent gains should you consider increasing the dollar size of your trades we are seeking repeatable setups and signals that can signal profitable trades while keeping our risks as low as possible we then want to practice the same setup until we can return consistent gains and limit any losses the stock market is a chaotic environment at best so we need to simplify anything that we can and remain focused on the critical pieces of information the main goal should also stay in focus maximizing profits while limiting losses
