national geographic society and nasa the recent collaboration with cern brings quantum physics to the reach of children there is no subject that young children can not learn when the medium is age appropriate fun and engaging the fast and the furious drivers speed cameras and control in a risk society presents a sociological and criminological perspective critical to understanding the driver s role at the centre of road safety interventions such an approach is it is argued as crucial to an understanding of attempts to reduce road crashes deaths and injuries as approaching such questions from an engineering or educational perspective the book offers an explanation for the continued debate about one road safety intervention the speed camera by situating that debate within contemporary literature about the risk society beck 1992 and more broadly understood experiences of risk faced on a daily basis by drivers rather than a focus on risk as something that can be objectively assessed measured and managed separately from the social context in which it is encountered it suggests that risk is something that permeates this particular debate from every angle the book achieves its aims by utilising sociological and criminological perspectives to investigate issues such as the social context in which it is possible for drivers to reject official scientific expertise about crash causation and camera effectiveness the self defined respectability of the population being

problematised and its juxtaposition with a proper police focus on real criminals the reconceptualisation of law breaking as risk taking rather than inherently wrong behaviour and its consequences for the enforcement of laws based on risk assessment the experience of being controlled by technology and of receiving what is essentially automated justice these and other issues are explored and suggested as illuminating of both the real concerns underpinning this debate and potentially instructive for future attempts to control risky behaviour both within and beyond a road safety context in his latest science fiction volume *algis budrys* author of *the unexpected dimension* and who continues to cast a scorching eye at life as it is lived today skilfully extrapolating a present trend a times and sunday telegraph book of the year wonderfully entertaining comprehensive and astute the times sweeping and ambitious sharpe is a humane and clear eyed guide to a series of intractable and timely questions observer a magisterial book the outlaw s song has surely never been better rendered times literary supplement from the tragic tale of mary clifford whose death at the hands of her employer scandalised georgian london to an account of the violent activities of victorian manchester s scuttling gangs via a character portrait of the duel obsessed cavalier sir john resesby a fiery furious people explores the brutal underside of our national life in all its variety and as it considers the litany of assaults murders and riots that pepper our history it also traces the subtle shifts that have taken place both in the nature of violence and in people s attitudes to it why was it for example that wife beating could at once be simultaneously legal and so frowned upon that persistent offenders might well end up being ducked in the village pond when did the serial killer first make an appearance in the annals of english crime how could football be regarded at one moment as a raucous pastime that should be banned and the next as a respectable sport that should be encouraged what gave rise to particular types of violent criminal medieval outlaws georgian highwaymen victorian garroters and what made them dwindle and then vanish throughout professor james sharpe draws on an astonishingly wide range of material court records and murder pamphlets popular ballads and novels sermons and films to paint vivid pictures of the nation s criminals and criminal system from medieval times to the present day he gives a strong sense of what it was like to be caught up in say a street brawl in medieval oxford or a battle during the english civil war and he also seeks to answer perhaps the most fascinating and fundamental question of all is a country that has experienced not only constant aggression on an individual scale but also the peasants revolt the gordon riots the poll tax protests and the urban unrest of summer 2011 naturally prone to violence or are we in fact gradually becoming a gentler nation deeply researched thoughtfully considered and vividly written read it history today sharpe s eye for detail ensures that the shock value never dwindles mail on sunday deeply thoughtful and thought provoking genuinely hard to put down bbc history magazine
