in the kitchen insists that the preparation of food whether imaginative physical or spatial is central to a deeper understanding of early modern food cultures and practices devoted to the arts of cooking and medicine early modern kitchens concentrated on producing processing and preserving materials necessary for nourishment and survival yet they also fed social and economic networks and nurtured a sense of physical spiritual and political connection to surrounding lands and their cultures the essays in this volume illuminate this expansive view of cooking and aspire to show how the kitchen s inner workings prove tightly though often invisibly interwoven with local national and increasingly global surroundings engaging with literary and historical methodologies including close reading recipe analysis and perspectives on gender class race and colonialism we begin to develop a shared theoretical and practical language for the art of cooking that combines the physical with the intellectual the local with the global and the domestic with the political
