israeli defense force idf rejected the long proven principles of war in favor of a novel incoherent and confusing doctrine the war revealed the debilitating impact of a long counterinsurgency campaign on training and traditional combined arms capabilities finally despite the superb performance of the israeli air force iaf airpower and technology proved to be inconclusive and a poor substitute for well trained resolute maneuver forces directly engaging enemy forces

in the progress of fun w s gilbert was considered not as a classic victorian but as part of an on going comedic continuum stretching from aristophanes to joe orton and beyond pipes and tabors continues the story covering the comedic experience differently by reference to genres here treated in relation to a line of significant others we discover how gilbert responded to areas such as the pastoral the irish drama nautical scenarios melodrama sensation theatre the nonsensemode pantomime spectaculars fairy plays and classical farce also included is a wider look at his relation to various european musical forms and for instance to the english line of wit and the elizabethan pamphleteers to consider a writer not so much by a study of individual works as by threads of linking generic modes tells us a great deal about cultural interconnections and the richly textured nature of theatrical experience pipes and tabors offers a tapestry of overlapping genres and treatments showing not just the design of the finished products but the shreds and patches which form the underside of the weave according to dorothy l sayers life itself offers us the apparent loose ends of a design which will only be revealed from the front after death in terms of gilbertian comedy we are privileged to be able to track both the effort of the weave and the skill of the finished product on the way we will also discover some new links and sub text implications about other 19th century denigrated groups which were buried from sight for too long

this book critically analyses the important role of radio in public life in post apartheid south africa as the most widespread and popular form of communication in the country radio occupies an essential space in the deliberation and the construction of public opinion in south africa from just a few state controlled stations during the apartheid era there are now more than 100 radio stations reaching vast swathes of the population and providing an important space for citizens to air their views and take part in significant socio economic and political issues of the country the various contributors to this book demonstrate that whilst print and television media often serve elite interests and audiences the low cost and flexibility of radio has helped it to create a common space for national dialogue and deliberation the book also investigates the ways in which digital technologies have enhanced the consumption of radio and produced a sense of imagined community for citizens including those in marginalised communities and rural areas this book will be of interest to researchers with an interest in media politics and culture in south africa specifically as well as those with an interest in broadcast media more generally
