The Management of Global Careers

2018-05-25

exploring global career issues in depth this important collection works at the intersection of career management and international hr it uses a multitude of perspectives to explore global career drivers experiences and outcomes for individuals as well as career systems and management within organisations and societies both long term and short term careers are discussed and examined alongside the impact that they have on elements of family life providing a useful guide for academic scholars hr managers and professionals operating in global environments

The Atheist's Bible: Diderot's 'Éléments de physiologie'

2020-11-16

love is harder to explain than hunger for a piece of fruit does not feel the desire to be eaten denis diderot s *Éléments de physiologie* presents a world in flux turning on the relationship between man matter and mind in this late work diderot delves playfully into the relationship between bodily sensation emotion and perception and asks his readers what it means to be human in the absence of a soul the atheist s bible challenges prevailing scholarly views on diderot s *Éléments* asserting its contemporary philosophical importance and prompting its readers to inspect more closely this little known and little studied work in this timely volume warman establishes the place of diderot s *Éléments* in the trajectory of materialist theories of nature and the mind stretching back to epicurus and lucretius and explores the fascinating reasons behind scholarly neglect of this seminal work in turn warman outlines the hitherto unacknowledged dissemination and reception of diderot s *Éléments* demonstrating how diderot s *Éléments* was circulated in manuscript form as early as the 1790s thus showing how the text came to influence the next generations of materialist thinkers this book is accompanied by a digital edition of jacques andré naigeon s *mémoires historiques et philosophiques sur la vie et les ouvrages de denis diderot 1823* a work which warman argues represents the first publication of diderot s *Éléments* long before its official publication date of 1875 the atheist s bible constitutes a major contribution to the field of diderot studies and will be of further interest to scholars and students of materialist natural philosophy in the age of enlightenment and beyond

The Travel Club - April 2021

2021-04-01

welcome to the 12th issue of the travel club a whole year has passed since the pandemic first hit a year that seems to have gone in a flash while at the same time dragging on forever the travel club was launched in may 2020 back during the early days of the first lockdown as guidebook sales slumped we knew that our survival lay in the support of our readers a community of dedicated travellers your support surpassed anything we could have imagined and that is something for which we will always be grateful but the travel club was never a charitable endeavour we wanted to create something that offered genuine and long term value to its members something that would become a much loved essential resource for those who are serious about travel i hope you feel we ve succeeded the e zine has gone from strength to strength each month with stories and contributions from far and wide just take a look at this bumper issue and we ve continued to build the list of exclusive membership benefits and discounts too many of which will come in handy as the world begins to open up of course if you ve any feedback or suggestions of ways in which we could improve things further or you d be interested in contributing yourself please do drop us a line at info@bradtguides.com we want to do the very best we can and when we start exploring the world again to do so hand in hand with all those who were with us during the dark times

Carnivores of Australia

2014-11-05

the australian continent provides a unique perspective on the evolution and ecology of carnivorous animals in earlier ages australia provided the arena for a spectacular radiation of marsupial and reptilian predators the causes of their extinctions are still the subject of debate since european settlement australia has seen the extinction of one large marsupial predator the thylacine another the tasmanian devil is in danger of imminent extinction and still others have suffered dramatic declines by contrast two recently introduced predators the fox and cat have been spectacularly successful with devastating impacts on the australian fauna carnivores of australia past present and future explores australia s unique predator communities from pre historic historic and current perspectives it covers mammalian reptilian and avian carnivores both native and introduced to australia it also examines the debate surrounding how best to manage predators to protect livestock and native biodiversity readers will benefit from the most up to date synthesis by leading researchers and managers in the field of carnivore biology by emphasising australian carnivores as exemplars of flesh eaters in other parts of the world this book will be an important reference for researchers wildlife managers and students worldwide

Industry 4.0

2020-05-17

industry 4 0 is a challenge for today s businesses it s a concept that encompasses the technological innovations of automation control and information technology as it s applied to manufacturing processes it s a new topic that recently emerged in academia and industry with few books that target both management and engineering this book will cover the new advances and the way to manage competitive organizations the chapters will include terms of theory evidence and or methodology and significantly advance social scientific research this book focuses on the latest and most recent research findings occurring on the topic of industry 4 0 presents the ways companies around the world are facing today s technological challenges assists researchers and practitioners in selecting the correct options and strategies to manage competitive organizations provides recent advances in international studies encompasses the main technological innovations in the fields of automation control and information technology applied to the manufacturing processes industry 4 0 challenges trends and solutions in manangement and engineering is designed to increase the knowledge and effectiveness of all managers and engineers in all organizations and activity sectors carolina machado has been teaching in the human resources management subjects since 1989 at university of minho portugal she has been an associate professor since 2004 with experience and research interest areas in the field of human resource management international human resource management human resource management in smes training and development emotional intelligence management change knowledge management and management hrm in the digital age she is head of the department of management and head of the human resources management work group at university of minho as well as chief editor of the international journal of applied management sciences and engineering ijamse j paulo davim is a professor at the department of mechanical engineering of the university of aveiro portugal he has more than 30 years of teaching and research experience in manufacturing materials mechanical and industrial engineering with special emphasis in machining tribology he has also interest in management engineering education and higher education for sustainability he has worked as evaluator of projects for erc european research council and other international research agencies

Georges Bataille

2007-08-30

until his death in 1962 bataille was an instrumental force in philosophical debate acting as a foil for both surrealism and existentialism and advocating radical views that spanned the entire spectrum of political thought stuart kendall chronicles these aspects of his intellectual development as well as tracing his pivotal role in the creation of journals such as documents and acéphale and how his writings in aesthetics and art history were the pioneering cornerstones of visual culture studies kendall positions bataille at the heart of a prodigious community of thinkers including andré breton michel leiris jean paul sartre alexandre kojève jacques lacan and maurice blanchot

among many others

Permanence de Charles Du Bos

1976

the question of the sublime which links the idea of aesthetic force with rhetorical impact and moral law has been an important topic in discussion of eighteenth and nineteenth century art and the shift between them this book argues that the sublime is equally important in understanding the shift from romanticism to modernism later in the century the author studies the work of three french authors conventionally considered pivotal figures in the trajectory from romanticism to modernism hugo father of romanticism baudelaire precursor of

symbolist modernism and lautreamont hero of post modernism she traces this literary historical as hugo s quatre vingt treize and l homme qui rit baudelaire s spleen de paris and petits poemes en prose and lautreamont s chants de maldoror and poesies all seen from a perspective of the aesthetics of the sublime this perspective is developed through analyses of the treatises on the sublime by longinus boileau burke and kant

for centuries the histories of france and germany have been linked in ways productive and destructive and each nation s sense of itself has often been shaped by admiration of or hostility toward the other harold mah explores the interweaving paths of german and french cultural identity that emerged in the enlightenment and continued through the nineteenth century and into the twentieth mah argues that the efforts of german and french intellectuals and artists to formulate stable cultural identities constantly collapsed in the face of other powerful images and the rush of history in mah s view these shifting conceptions of cultural identity are problematic phantasies internally unstable and prone to falling apart under the pressure of events only to be replaced by new equally problematic constructions mah offers fresh analyses of a wide range of iconic texts and artworks including those of jacques louis david de staël diderot and rousseau in france and goethe hegel herder mann marx and nietzsche in germany mah s book examines how attempts to define cultural identities were caught up in issues of language gender classical revival politics and modernity enlightenment phantasies presents the shaping of cultural identity in narratives accessible not only to specialists but also to students and all readers concerned with the history of western culture

Through the Eyes of Descartes

2024-02-06

in early nineteenth century britain there was unprecedented interest in the subject of genius as well as in the personalities and private lives of creative artists this was also a period in which literary magazines were powerful arbiters of taste helping to shape the ideological consciousness of their middle class readers romantic genius and the literary magazine considers how these magazines debated the nature of genius and how and why they constructed particular creative artists as geniuses romantic writers often imagined genius to be a force that transcended the realms of politics and economics david higgins however shows in this text that representations of genius played an important role in ideological and commercial conflicts within early nineteenth century literary culture furthermore romantic genius and the literary magazine bridges the gap between romantic and victorian literary history by considering the ways in which romanticism was understood and sometimes challenged by writers in the 1830s it not only discusses a wide range of canonical and non canonical authors but also examines the various structures in which these authors had to operate making it an interesting and important book for anyone working on romantic literature

Diario de Sesiones

1916

prison haunts our civilization writes victor brombert object of fear it is also a subject of poetic reverie focusing on french literature of the romantic era the author probes the manifold significance of imprisonment as symbol and metaphor of the human condition his thematic exploration draws on a constellation of writers ranging from the platonic and christian traditions to the existentialist generation professor brombert points out that nineteenth and twentieth century literature endowed the prison image with unusual prestige and he examines the historical and social reasons after considering the influence of pascal and of the myth of the bastille he closely analyzes the work of borel stendhal victor hugo nerval baudelaire huysmans and sartre with excursions into texts by byron dostoevsky kafka solzhenitsyn sade and others his approach reflects a concern with the interaction of literature historiography and popular myth this imaginative treatment deepens our understanding of romanticism and its favored themes it offers fresh thoughts as well about modern man s dialectical

tensions between oppression and inner freedom fate and revolt and the awareness of the finite and the longing for infinity a wide ranging conclusion speculates about the future of the prison theme in a world that has been threatened by extermination camps originally published in 1978 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905

EVOLVE - A Bridge between Probability, Set Oriented Numerics, and Evolutionary Computation II

2012-08-14

originally published in 1963 perhaps the most generative ethical question of eighteenth century france was how to live a virtuous and happy life at the same time during the age of enlightenment christianity fell out of vogue as the dominant and authoritative moral code in place of christianity s emphasis on sin and redemption in light of a supposed afterlife present happiness became recognized as an appropriate end goal among french enlightenment thinkers french intellectuals struggled to find equilibrium between nature a person s individual goals and needs and culture the political economic and social organization of humans for a collective good enlightenment discourse generated a unique cultural moment in which thinkers addressed the problems of humans moral coexistence through the dichotomy of nature and culture lester crocker addresses these questions in an overview of ethical thought in eighteenth century france
