The Asiatic Journal 1837

this book explores the administration of iran under mongol rule through taxation and monetary policy a consistent development is evident only from abundant numismatic material from the conquest of samarqand by chingiz khan to the reign of the penultimate ruler uljaytu in many cases the individuals responsible for initiating and conducting the policies can be identified from the histories or remarks of the mint master the structure of the empire is clearly demarcated by mint production coin styles and type of metal this illuminates many controversial historical points such as the meaning and function of an il khan and the establishment of the toluid dynasty under hulagu the mongols broke the crust of an inflexible and archaic islamic monetary tradition that had hampered economic development by encouraging extensive trade and the sciences especially astronomy and higher mathematics through determined and always pragmatic programmes

komaroff curator of islamic art los angeles county museum of art and carboni curator of islamic art metropolitan museum of art produced this fine catalog to accompany a major show of ilkhanid as the mongol dynasty was called after conversion to islam art exhibited at the authors museums in new york and los angeles in 2002 2003 most of the manuscripts metalwork textiles ceramics and other finely decorated objects were created in iran many objects are also included from the yuan dynasty in china during which the mongols ruled eight full length essays are built around the objects of the exhibition and other works all depicted in color the essays describe the history culture courtly life artistic exchanges religious art arts of the book and creation of a new visual language distributed by yale u press annotation copyrighted by book news inc portland or

The Asiatic Journal and Monthly Register for British and Foreign India, China and Australasia; 2019-03-24

this is the first world history of empire reaching from the third millennium bce to the present by combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents from asia to europe and from africa to the americas only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power we cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of european colonialism the history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history volume two the history of empires tracks the protean history of political domination from the very beginnings of state formation in the bronze age up to the present case studies deal with the full range of the historical experience of empire from the realms of the achaemenids and asoka to the empires of mali and songhay and from ancient rome and china to the mughals american settler colonialism and the soviet union forty five chapters detailing the history of individual empires are tied

together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases
