the death penalty was unusual in medieval europe until the twelfth century from that moment on it became a key instrument of rule in european society and we can study it in the case of catalonia through its rich and varied unpublished documentation the death penalty was justified by roman law accepted by theology and philosophy for the common good and used by rulers as an instrument for social intimidation the application of the death penalty followed a regular trial and the status of the individual dictated the method of execution reserving the fire for the worst crimes as the inquisition applied against the so called heretics the executions were public and the authorities and the people shared the common goal of restoring the will of god which had been broken by the executed person the death penalty took an important place in the core of the medieval mind people included executions in the jokes and popular narratives while the gallows filled the landscape fitting the jurisdictional limits and also showing rotten corpses to assert that the best way to rule and order the

society is by terror this book utilises previously unpublished archival sources to present a unique study on the death penalty in late medieval europe

in contested treasure thomas barton examines how the jews in the crown of aragon in the twelfth through fourteenth centuries negotiated the overlapping jurisdictions and power relations of local lords and the crown the thirteenth century was a formative period for the growth of royal bureaucracy and the development of the crown s legal claims regarding the jews while many jews were under direct royal authority significant numbers of jews also lived under nonroyal and seigniorial jurisdiction barton argues that royal authority over the jews as well as muslims was far more modest and contingent on local factors than is usually recognized diverse case studies reveal that the monarchy s jewish policy emerged slowly faced considerable resistance and witnessed limited application within numerous localities under nonroyal control thus allowing for more highly differentiated local modes of jewish administration and coexistence contested treasure refines and complicates our portrait of interfaith relations and the limits of royal authority in medieval spain and it presents a new approach to the study of ethnoreligious relations and administrative history in medieval european society

beginning in the twelfth century taxation increasingly became an essential component of medieval society in most parts of europe the state building process and relations between princes and their subject cities or between citizens and their rulers were deeply shaped by fiscal practices although medieval taxation has produced many publications over the past decades there remains no synthesis of this important subject this volume provides a comprehensive overview on a european scale and suggests new paths of inquiry it examines the fiscal systems and practices of medieval europe including essential themes such as medieval fiscal theory and the power to tax royal and urban taxation and church taxation it goes on to survey the entire european continent as well as including comparative chapters on the non european medieval world exploring questions on how taxation

developed and functioned what kinds of problems authorities encountered assessing their fiscal power and the circulation of fiscal cultures and practices across cities and kingdoms the book also provides a glossary of the most important types of medieval taxes giving an essential definition of key terms cited in the chapters the routledge handbook of public taxation in medieval europe will appeal to a large audience from seasoned scholars who need a comprehensive synthesis to students and younger scholars in search of an overview of this critical subject

in the wake of modern genocide we tend to think of violence against minorities as a sign of

intolerance or even worse a prelude to extermination violence in the middle ages however functioned differently according to david nirenberg in this provocative book he focuses on specific attacks against minorities in fourteenth century france and the crown of aragon aragon catalonia and valencia he argues that these attacks ranging from massacres to verbal assaults against jews muslims lepers and prostitutes were often perpetrated not by irrational masses laboring under inherited ideologies and prejudices but by groups that manipulated and reshaped the available discourses on minorities nirenberg shows that their use of violence expressed complex beliefs about topics as diverse as divine history kinship sex money and disease and that their actions were frequently contested by competing groups within their own society nirenberg s readings of archival and literary sources demonstrates how violence set the terms and limits of coexistence for medieval minorities the particular and contingent nature of this coexistence is underscored by the book s juxtapositions some systematic for example that of the crown of aragon with france jew with muslim medieval with modern and some suggestive such as african ritual rebellion with catalan riots throughout the book questions the applicability of dichotomies like tolerance versus intolerance to the middle ages and suggests the limitations of those analyses that look for the origins of modern european persecutory violence in the medieval past
