## **The Meaning of Tradition 1964**

the moorlands of gascony are often considered one of the most dramatic examples of top down rural modernization in nineteenth century europe from an area of open moors they were transformed in one generation into the largest man made forest in europe body and tradition in nineteenth century france explores how these changes were experienced and negotiated by the people who lived there drawing on the immense ethnographic archive of félix arnaudin 1844 1921 the study places the songs stories and everyday speech that arnaudin collected as well as the photographs he took in the everyday lives of agricultural workers and artisans it argues that the changes are were understood as a gradual revolution in bodily experiences as men and women forged new working habits new sexual relations and new ways of conceiving of their own bodies rather than merely presenting a story of top down reform this is an account of the flexibility and creativity of the cultural traditions of the working population william g pooley tells

the story of the folklorist arnaudin and the men and women whose cultural traditions he recorded then uncovers the work carried out by arnaudin to explore everyday speech about the body stories of werewolves and shapeshifters tales of animal cunning and exploitation and songs about love and courtship the volume focuses on the lives of a handful of the most talented storytellers and singers arnaudin encountered showing how their cultural choices reflect wider patterns of behaviour in the region and across rural europe

this volume examines mystical experiences as portrayed in various ways by authors such as philosophers mystics psychoanalysts writers and peasant women these mystical authors have throughout the ages attempted to convey the unsayable through writings paintings or oral stories the immediate experience of god is the primary source and ultimate goal of these mystical expressions this experience is essentially ineffable yet all mystical authors either consciously or unconsciously feel an urge to convey what they have undergone in the moments of rapture at the same time they are in the role of intermediaries the goal of their self expression either written painted or oral is to make others somehow understand or feel what they

have experienced and to lead others toward the spiritual goal of human life this volume studies the mystical experiences and the way they have been described or portrayed in west european culture from antiquity to the present from an interdisciplinary perspective and approaches the concept of immediate experience in various ways

freedom and tradition in hegel stands at the intersection of three vital currents in contemporary ethics debates over philosophical anthropology and its significance for ethics reevaluations of tradition and modernity and a resurgence of interest in hegel thomas a lewis engages these three streams of thought in light of hegel s recently published vorlesungen über die philosophie des geistes drawing extensively on these lectures lewis addresses an important lacuna in hegelian scholarship by first providing a systematic analysis of hegel s philosophical anthropology and then examining its fundamental role in hegel s ethical and religious thought lewis contends that hegel s anthropology seeks to account for both the ongoing significance of the religious and philosophical traditions in

which we are raised and our ability to transcend these traditions pursuing the implications of the integral role of practice in hegel s anthropology lewis argues for a more progressive interpretation of hegel s ethics and a hegelian critique of hegel s most problematic statements on political and social issues lewis concludes that hegel offers a powerful strategy for reconciling freedom and tradition this fresh interpretation of hegel s work provides a challenging new perspective on his ethical and religious thought it will be of significant value to students and scholars in religious studies philosophy and political theory

the fact that africa continues to lag behind all regions of the world on every indicator of development is hardly contentious however there is fierce debate on why this should be the case despite national and international efforts to reverse this situation while this book does not attempt to answer this question per se it addresses a largely ignored but important issue which might provide some insights into the matter this issue is the link between culture tradition and socio

economic development in africa by weaving a common thread through these concepts this book breaks new ground in the discourse on development it highlights the differences between euro centric culture which is rooted in capitalist ideology and protestant ethic and traditional african culture where concepts such as capital accumulation entrepreneurial attitudes and material wealth are not of top priority in doing so it dispels popular myths stereotypes and distortions as well as discounting misleading accounts about major aspects of african culture and traditional practices

between the american revolution and the civil war many americans professed to reject altogether the notion of adhering to tradition perceiving it as a malign european influence but by the beginning of the twentieth century americans had possibly become more tradition minded than their european contemporaries so argues michael d clark in this incisive work of social and intellectual history challenging

reigning assumptions clark maintains that in the period 1865 to 1942 americans became more conscious of tradition as a social force viewed it more positively and used it more eclectically and selectively for personal and social enrichment clark expands upon the existing body of scholarly work by clearly distinguishing tradition from other ways of relating to the past and by studying particular traditions that shaped american thought and culture he gives primary attention to five individuals who represent the growing influence of tradition in this period the popular philosopher and historian john fiske representing anglo american tradition the virginia historians philip bruce and lyon g tyler representing a southern variation on a national tradition the country s leading neo gothic architect ralph adams cram representing a surprisingly pervasive medieval tradition and the sociologist charles h cooley representing views on immigrant traditions clark examines how the idea of tradition initially associated with family home and local town was carried outward to the larger sphere and applied to promote american expansionism territorially economically and demographically tradition was also used as a weapon by well entrenched social groups in struggles over power and values it offered a sense of stability in a time of unsettling technological and sociological change ironically

clark shows traditionalists of this era helped to create a modern sensibility by opposing the victorian linear sense of history and employing instead historical cycles and typology as ways to bridge past and present the american discovery of tradition 1865 1942 describes a period of time when the social and intellectual forces of tradition and modernity converged in the united states america was both a nation looking back now having a memory of its own past and a nation looking forward to future progress clark s book reveals the shaping of the modern american self and its distinctive attitude both positive and negative toward tradition
