Book jacket: Digital Pharma Marketing Playbook is a first of its kind of book. It is the first and only book that presents 101 cases in digital pharma marketing. These cases show how some of the leading pharmaceutical companies across the world have used digital and social media channels. They are also excellent learning opportunities to all pharma marketing and brand managers and students of pharmaceutical marketing. Digital transformation is sweeping the world around us. Everything these days has become digital. The ever-increasing rate of adoption of wearable devices and the advent of the Internet of Things are digitizing more and more of our experience. At the same time, healthcare in general and the pharmaceutical industry in particular have been lagging in adapting to a digital strategy. It is not that pharma is new to multichannel marketing. The pharmaceutical industry traditionally has been following a multichannel marketing strategy where most of the channels have been static rather than dynamic. The number of channels has increased significantly due to the internet explosion. Pharma is moving to a multi-stakeholder world, a world in which stakeholders beyond the prescriber are gaining importance. These new influencer groups, such as patients, nurses, payers, and regulators, are increasingly turning to digital channels for their information needs regarding healthcare. Digital therefore plays a vital role in reaching these new audiences. If you want to maximize the impact of your marketing communications, can you afford to ignore the channels that your stakeholders are frequently using? Of course not. Therefore, the question is not to digitize or not to digitize, but how soon and how effectively. Why a digital pharma marketing playbook? Because a playbook is a one-stop, read-or-single-source resource for all the essential information that you need on a given sport. In our case, digital pharma marketing. If you can make work more fun and enjoyable, it is play. Moreover, when work becomes play, there are no goals that you cannot score. Contents: 1. Challenging times, changing rules. 2. Digital revolution. 3. Digital pharma marketing. 4. Social media marketing and pharma. 5. Digital transformation. The content corresponds with the four core competencies identified for success as a professional speaker: members of the National Speakers Association who have built thriving speaking businesses weigh in with valuable insights and proven strategies on a gamut of topics.
