community is one of those words that feels good it is good to have a community to be in a community and community feels good because of the meanings which the word conveys all of them promising pleasures and more often than not the kind of pleasures which we would like to experience but seem to miss community conveys the image of a warm and comfortable place like a fireplace at which we warm our hands on a frosty day out there in the street all sorts of dangers lie in ambush in here in the community we can relax and feel safe community stands for the kind of world which we long to inhabit but which is not regrettably available to us today community is another name for paradise lost but for a paradise which we still hope to find as we feverishly search for the roads that may lead us there but there is a price to be paid for the privilege of being in a community community promises security but seems to deprive us of freedom of the right to be ourselves security and freedom are two equally precious and coveted values which could be balanced to some degree but hardly ever fully reconciled the tension between security and freedom and between community and individuality is unlikely ever to be resolved we cannot escape the dilemma but we can take stock of the opportunities and the dangers and at least try to avoid repeating past errors in this important new book zygmunt bauman takes stock of these opportunities and dangers and in his distinctive and brilliant fashion offers a much needed reappraisal of a concept that has become central to current debates about the nature and future of our societies

creating authentic customer connections in a high tech world in the relationship economy author john dijulius teaches business leaders about the importance of relationship building in the digital age he argues that in spite of and because of the advances in tech we ve become a less connected society we have dramatically evolved away from face to face communication and the skill of building rapport is evaporating this means that customer personalization and relationships are more important now than ever and they will be the key to success for businesses moving forward as he aptly states being able to build true sustainable relationships is the biggest competitive advantage in a world where automation artificial intelligence and machine learning are eliminating the human experience which is what creates the emotional connections that build true customer loyalty this book reminds readers of the importance of personal connections and shows them how to attain meaningful lasting relationships with their customers

in the third volume of thomas keneally s unique history of australia where he shines a light on the lives and deeds of our countrymen and women both known and unknown he takes up the story at the end of the great war and explores our development as a nation during the tumultuous 20th century australia emerged from world war i into a decade of profound change characterised by a revolution in behaviour amongst the young by the first great age of consumerism and by secret right wing armies and the

growth of the communist party as in the two previous volumes of australians thomas keneally brings history to vivid and pulsating life as he traces the lives and the deeds of australians known and unknown he follows the famous and the infamous through the great crash and the rise of fascism and explains how australia was inexorably drawn into a war that led her forces into combat throughout asia africa europe and the pacific at home an atmosphere of fear grew with the fall of singapore and the bombing of darwin the japanese advance and then the arrival of general macarthur the 1950s depicted by some as an age of full employment by others as the age of suburban spread and boredom under the serene prime ministership of robert menzies were as complicated as menzies himself most australians believed there would be nuclear war before the end of the decade the korean war and british testing of the atomic bomb in south australia were seen as preludes with the defection of the soviet spy ivan petrov australians were convinced they were living in the last of days on the street the face of australia was undergoing an italian greek and slavica led change and in even greater upheaval asian trade and immigration were coming our way as we advanced towards a war in vietnam and the firming of the american alliance the result of masterly writing and exhaustive research this volume of australians brings our more recent history to vibrant and robust life
