The Plant Kingdom 1970

explains what life forms make up the plant kingdom what characteristics they have in common and how they are unique

The Plant Kingdom 2000

non fiction beautiful books with both illustrations and real photography for year 3 to 7 key skills include instructional text understanding fact and opinion exploring diagrams scan texts summarising information identifying key features of non fiction texts cross curricular topics include websites for further research life science earth and space social studies health physical science and ict the books are a rich resource for visual literacy size 21 5cm tall x 16 5cm wide published 1999 32 pages

Curiosities of the Plant Kingdom 1980

compared to the obvious complexity of animals plants at a glance seem relatively simple in form but that simplicity is deceptive the plants around us are the result of millennia of incredible evolutionary adaptations that have allowed them to survive and thrive under wildly changing conditions and in remarkably specific ecological niches much of this innovation however is invisible to the naked eye with wonders of the plant kingdom the naked eye gets an unforgettable boost a stunning collaboration between science and art this gorgeous book presents hundreds of images of plants taken with a scanning electron microscope and hand colored by artist rob kessler to reveal the awe inspiring adaptations all around us the surface of a peach with its hairs or trichomes and sunken stomata or breathing pores emerges from these pages in microscopic detail the dust like seeds of the smallest cactus species in the world the blossfeldia liliputana which measures just twelve millimeters fully grown explode here with form color and character while the flower bud of a kaffir lime cross sectioned reveals the complex of a flower bud with the all important pistil in the center accompanying these extraordinary images are up to date explanations of the myriad ways that these plants have ensured their own survival and by proxy our own gardeners and science buffs alike will marvel at this wholly new perspective on the world of plant diversity

Evolution and Design in the Plant Kingdom 1969

a unique guide to the extraordinary world of plants from the smallest seeds to the tallest trees we couldn't live without plants we need them for food shelter and even the air we breathe yet we know surprisingly little about them why do thistles bristle with spines how do some plants trap and eat insects did you know there are trees that are 5,000 years old trees leaves flowers seeds explores the mysterious world of plants to find the answers to these and many more questions each type of plant such as a
health safety and environment test for operatives bsl and specialists operatives specialists

flowering plant tree grass or cactus is examined close up with an example shown from all angles and even in cross section to highlight the key parts then picture packed galleries show the wonderful variety of plants on different themes perhaps the habitat they grow in a flower family or the plants that supply us with our staple foods but the book also takes a fun look at some truly weird and wonderful plants including trees with fruits like a giant s fingers orchids that look like monkey faces seeds that spin like helicopters and trees that drip poison so open this beautiful book and find out more about amazing trees leaves flowers seeds

THE PLANT KINGDOM 1974

the scientific study of plants are called botany plants included algae bryophyte pteridophyte and gymnosperms there are at least 320 000 species of plants are found humans depends on plants for food medicine welcome to the plant kingdom this book describes general characteristics of algae bryophyte pteridophyte gymnosperms and angiosperms

The Plant Kingdom 2004

from the smallest seeds to the tallest trees this beautiful children s guide is a must have for any budding botanist or plant lover we can t live without plants we need them for food shelter even the air we breathe yet we know surprisingly little about them why do thistles bristle with spines how do some plants trap and eat insects did you know there are trees more than 5 000 years old trees leaves flowers seeds explores the mysterious world of plants to find the answers to these and many more questions this picture packed encyclopedia shows a wonderful variety of plants from fantastic ferns to spiky cacti it explores the diverse habitats of plants herbs and spices that make our food tasty and even how astronuat grow plants in space it also takes a fun more sideways look at some truly weird and wonderful plants including leaves that are home to frogs orchids that look like parrots and seeds that spin like helicopters so open this fascinating ebook and find out more about the amazing world of trees leaves flowers and seeds

The Plant Kingdom 2008

a ground breaking collaboration between an artist and two botanists this book tells the story of how flowers disseminate their pollen and how the pollinated flower turns into a fruit beginning a whole new chapter in a plant s life it is the success or failure of a fruit to disperse its seeds that decides the survival or extinction of a species this crucial role of fruits and seeds explains the fascinating spectrum of strategies and ruses that plants have evolved over millions of years to achieve their dispersal apart from safety and delicious and enticing domesticated fruits we so love nature also holds a stock of a wide variety of wild fruits but whether they rely on wind water humans animals or their

own explosive forces the dispersal strategies of fruits are reflected in a wonderful cornucopia of different colours shapes and sizes this book combines extraordinary images with a clear easily accessible yet scientifically accurate text explaining the different forms of pollen seeds and fruit and their role in preserving the biodiversity of our planet
