## **Evaluating the Language of Argument 2020-12-01**

this book is concerned with the evaluation of natural argumentative discourse and in particular with the language in which arguments are expressed it introduces a systematic procedure for the analysis and assessment of arguments which is designed to be a practical tool and may be considered a pseudo algorithm for argument evaluation the first half of the book lays the theoretical groundwork with a thorough examination of both the nature of language and the nature of argument this leads to a definition of argumentation as reasoning expressed within a procedure which itself yields the three frames of analysis used in the evaluation procedure process reasoning and expression the second half begins with a detailed discussion of the concept of fallacy with particular attention on fallacies of language their origin and their effects a new way of looking at fallacies emerges from these chapters and it is that conception together with the understanding of the nature of argumentation described in earlier sections which ultimately provides the support for the comprehensive assessment procedure for natural argumentation the first two levels of this innovative procedure are outlined while the third that dealing with language and involving the development of an informal argument semantics is fully described the use of the system and its power of analysis are illustrated through the evaluation of a variety of examples of argumentative texts

## **Local Theories of Argument 2021-03-25**

argumentation is often understood as a coherent set of western theories birthed in athens and developing throughout the roman period the middle ages the enlightenment and renaissance and into the present century ideas have been nuanced developed and revised but still the outline of argumentation theory has been recognizable for centuries or so it has seemed to western scholars the 2019 alta conference on argumentation co sponsored by the national communication association and the american forensic association aimed to question the generality of these intellectual traditions this resulting collection of essays deals with the possibility of having local theories of argument local to a particular time a particular kind of issue a particular place or a particular culture many of the papers argue for reconsidering basic ideas about arguing to represent the uniqueness of some moment or location of discourse other scholars are more comfortable with the western traditions and find them congenial to the analysis of arguments that originate in discernibly distinct circumstances the papers represent different methodologies cover the experiences of different nations at different times examine varying sorts of argumentative events speeches court decisions food choices and sound explore particular personal identities and the issues highlighted by them and have different overall orientations to doing argumentation scholarship considered together the essays do not generate one simple conclusion but they stimulate reflection about the particularity or generality of the experience of arguing and therefore the scope of our theories

## **Narration as Argument 2017-05-09**

this book presents reflections on the relationship between narratives and argumentative discourse it focuses on their functional and structural similarities or dissimilarities and offers diverse perspectives and conceptual tools for analyzing the narratives potential power for justification explanation and persuasion divided into two sections the first part under the title narratives as sources of knowledge and argument includes five chapters addressing rather general theoretical and characteristically philosophical issues related to the argumentative analysis and understanding of narratives we may perceive here how scholars in argumentation theory have recently approached certain topics that have a close connection with mainstream discussions in epistemology and the cognitive sciences about the justificatory potential of narratives the second part entitled

argumentative narratives in context brings us six more chapters that concentrate on either particular functions played by argumentatively oriented narratives or particular practices that may benefit from the use of special kinds of narratives here the focus is either on the detailed analysis of contextualized examples of narratives with argumentative qualities or on the careful understanding of the particular demands of certain well defined situated activities as diverse as scientific theorizing or war policing that may be satisfied by certain uses of narrative discourse

## **Disturbing Argument 2015-01-30**

argumentation mining is an application of natural language processing nlp that emerged a few years ago and has recently enjoyed considerable popularity as demonstrated by a series of international workshops and by a rising number of publications at the major conferences and journals of the field its goals are to identify argumentation in text or dialogue to construct representations of the constellation of claims supporting and attacking moves in different levels of detail and to characterize the patterns of reasoning that appear to license the argumentation furthermore recent work also addresses the difficult tasks of evaluating the persuasiveness and quality of arguments some of the linguistic genres that are being studied include legal text student essays political discourse and debate newspaper editorials scientific writing and others the book starts with a discussion of the linguistic perspective characteristics of argumentative language and their relationship to certain other notions such as subjectivity besides the connection to linguistics argumentation has for a long time been a topic in artificial intelligence where the focus is on devising adequate representations and reasoning formalisms that capture the properties of argumentative exchange it is generally very difficult to connect the two realms of reasoning and text analysis but we are convinced that it should be attempted in the long term and therefore we also touch upon some fundamentals of reasoning approaches then the book turns to its focus the computational side of mining argumentation in text we first introduce a number of annotated corpora that have been used in the research from the nlp perspective argumentation mining shares subtasks with research fields such as subjectivity and sentiment analysis semantic relation extraction and discourse parsing therefore many technical approaches are being borrowed from those and other fields we break argumentation mining into a series of subtasks starting with the preparatory steps of classifying text as argumentative or not and segmenting it into elementary units then central steps are the automatic identification of claims and finding statements that support or oppose the claim for certain applications it is also of interest to compute a full structure of an argumentative constellation of statements next we discuss a few steps that try to dig deeper to infer the underlying reasoning pattern for a textual argument to reconstruct unstated premises so called enthymemes and to evaluate the quality of the argumentation we also take a brief look at the other side of mining i e the generation or synthesis of argumentative text the book finishes with a summary of the argumentation mining tasks a sketch of potential applications and a necessarily subjective outlook for the field
