the experiential theory proposed by kolb takes a more holistic approach and emphasizes how experiences including cognition environmental factors and emotions influence the learning process david kolb published his learning styles model in 1984 from which he developed his learning style inventory kolb s experiential learning theory works on two levels a four stage learning cycle and four separate learning styles much of kolb s theory concerns the learner s internal cognitive processes in how you learn is how you live using nine ways of learning to transform your life david kolb and kay peterson elaborate on the experiential learning theory and how it can be used by educators corporate teams leaders and individual lifelong learners the humanistic and constructivist approaches to education which emphasize that learning occurs naturally include david kolb s theory of experiential learning kolb proposed that experience was critical in the development of knowledge construction as learning occurs through discovery and active participation a four stage cyclical theory of learning kolb s experiential learning theory is a holistic perspective that combines experience perception cognition and behavior david a kolb published his experiential learning theory elt in 1984 inspired by the work of the gestalt psychologist kurt lewin as well as john dewey and jean piaget the approach works on two levels a four stage learning cycle and four distinct learning styles experiential learning theory elt emphasizes the importance of experience and its role in the learning process kolb 1984 moreover it uses experience to describe its vital difference from cognitive learning theory which focuses on cognition and behavioral learning theory this chapter focuses on presenting practical applications of kolb s experiential learning theory elt in classroom practice but firstly it looks at defining and modelling the theory it examines kolb s original model of elt and then presents an experiential learning is a powerful and proven approach to teaching and learning that is based on one incontrovertible reality people learn best through experience now in this extensively abstract this chapter summarises the work of david kolb who has advanced the earlier work of dewey lewin and piaget on experiential theory elt kolb s model of elt is considered in terms of its development from the basic concept that knowledge is created as a result of experience david kolb is a psychologist and educational theorist who is perhaps best known for his theory of experiential learning in addition to developing a theory that outlined how experiential learning takes place kolb is also known for his learning style inventory that remains quite popular among educators today david a kolb is an american psychologist professor and educational theorist he was born in december 1939 in illinois united states today kolb is best known for his work in experiential learning in fact kolb s learning styles model was one of the first tools for evaluating individual learning preferences in 1984 david kolb introduced experiential learning theory he was inspired by the work of jean piaget kurt lewin and john dewey his model gained recognition and he is now best known for giving this theory he gave a 4 stage cycle of learning and 4 separate learning styles beginning in the 1970s david a kolb helped develop the modern theory of experiential learning drawing heavily on the work of john dewey kurt lewin and jean piaget 10 experiential learning has significant teaching advantages peter senge author of the fifth discipline 1990 states that teaching is of utmost importance to motivate people experiential learning theory elt was created to provide an intellectual foundation for the practice of experiential learning responding to john dewey s call for a theory of experience to guide educational innovation the experiential learning theory works in four stages concrete learning reflective observation abstract conceptualization and active experimentation the first two stages of the cycle involve grasping an experience the second two focus on transforming an experience david allen kolb 1939 american organizational sociologist and educational theorist is best known for his research into experiential learning and learning styles as the name suggests kolb s theory of experiential

learning posits that much of learning takes place as we make sense of the experiences that we have. The four steps of Kolb's theory are concrete experience, reflective observation, abstract conceptualization, and active experimentation. David Kolb (1984) created experiential learning theory to unify the contributions and insights of these scholars into an explicit and coherent framework based both on the common perspectives they share and the unique contributions they have made to our understanding of experiential learning. Core concepts of experiential learning theory, the learning cycle, learning style, and learning space, have been widely used by experiential educators in higher education for nearly half a century.
