Star Wars Battles that Changed the Galaxy 2010-10-01

from a noted Cambridge zoologist a wildly fun and scientifically sound exploration of what alien life must be like using universal laws that govern life on earth and in space scientists are confident that life exists elsewhere in the universe yet rather than taking a realistic approach to what aliens might be like we imagine that life on other planets is the stuff of science fiction the time has come to abandon our fantasies of space invaders and movie monsters and place our expectations on solid scientific footing but short of aliens landing in New York City how do we know what they are like using his own expert understanding of life on earth and Darwin's theory of evolution which applies throughout the universe Cambridge zoologist Dr. Ari Kershenbaum explains what alien life must be like how these creatures will move socialize and communicate for example by observing fish whose electrical pulses indicate social status we can see that other planets might allow for communication by electricity as there was evolutionary pressure to wriggle along a sea floor earthling animals tend to have left-right symmetry on planets where creatures evolved in mid-air or in soupy tar they might be lacking

any symmetry at all might there be an alien planet with supersonic animals a moon where creatures have a language composed of smells will aliens scream with fear act honestly or have technology the zoologist s guide to the galaxy answers these questions using the latest science to tell the story of how life really works on earth and in space

The Rough Guide to The Hitchhiker's Guide to the Galaxy **2010-09-01**

are science and technology independent of one another is technology dependent upon science and if so how is it dependent is science dependent upon technology and if so how is it dependent or are science and technology becoming so interdependent that the line dividing them has become totally erased this book charts the history of technoscience from the late nineteenth century to the end of the twentieth century and shows how the military industrial academic complex and big science combined to create new examples of technoscience in such areas as the nuclear arms race the space race the digital age and the new worlds of nanotechnology and biotechnology
