a waterstones best popular science book of 2023 delightfully clear and vivid to read a splendid book philip pullman absolutely fascinating james o brien an exceptional book readable funny and more needed than ever dr chris van tulleken bestselling author of ultra processed people are you more likely to become a professional footballer if your surname is ball how can you be one hundred per cent sure you will win a bet why did so many pompeians stay put while mount vesuvius was erupting how do

you prevent a nuclear war ever since the dawn of human civilisation we have been trying to make predictions about what's in store for us we do this on a personal level so that we can get on with our lives efficiently should I hang my laundry out to dry or will it rain but we also have to predict on a much larger scale often for the good of our broader society how can we spot economic downturns or prevent terrorist attacks for just as long we have been getting it wrong from religious oracles to weather forecasters and from politicians to economists we are subjected to poor predictions all the time our job is to separate the good from the bad unfortunately the foibles of our own biology the biases that ultimately make us human can let us down when it comes to making rational inferences about the world around us and that can have disastrous consequences how to expect the unexpected will teach you how and why predictions go wrong help you to spot phony forecasts and give you a better chance of getting your own predictions correct
