Abstract: This book presents a comprehensive assessment of anti cartel enforcement and investigative procedures in India. It makes a case for enhanced sanctions for cartel conduct in India, as cartels are considered the most pernicious violation of competition law, referred to as cancer to the free market economy. While competition laws in most jurisdictions prescribe strict sanctions against cartels, Indian competition law provides only civil penalties with an upper ceiling for proven cartel conduct. This volume assesses the effectiveness of anti-cartel enforcement of the Competition Commission of India (CCI). It explores investigative procedures of the CCI through multiple qualitative and quantitative indicators and the extent to which enforcement of anti-cartel laws in India has led to cartel deterrence. Further, it also examines the priorities and processes of the CCI in terms of anti-cartel enforcement, their sanctioning mechanism, and their dependency of computation of penalty on varied factors. Featuring detailed case law studies and engaging data, this book will be an essential read for students and researchers of law and legal studies, competition law, corporate law, intellectual property law, and business law.
