Report of the First-second Annual Meeting of the Index Society 1829 volume ii of this mammoth reference work
covers the years in which the league of nations failed because of the emerging dictatorships in germany and italy and
the expansionist policies adopted by japan britain was still reeling from the consequences of world war i and the raf
was sadly far behind the other major world powers in aircraft design still relying on bi planes that were direct
descendants of world war i thinking it gradually became apparent that despite uk government dithering the raf needed
to develop new aircraft engines and increase production to confront the bully boy tactics of the axis powers as the
turn of the decade approached extraordinary measures were taken to enable raf to defend britain s skies and this her
freedom as with volume 1 this book covers every conceivable part of the raf s history through these pre war days it
looks at the development and invention of new equipment such as radar monoplane fighters metal construction and the
heavy bomber this was an era when science in aviation was rushing ahead and fortunately for britain s freedom it laid

the foundations of victory in 1 945
