and conducting case study to provide a comprehensive and practical account of how to design conduct and communicate case study research it addresses questions often raised by students and common misconceptions about case research in four sections the book covers rationale concept and design of case study research methods ethics and reflexivity in case study interpreting analyzing and reporting the case generalizing and theorizing in case study research rich with tales from the field and summary memos as an aide memoire to future action the book provides fresh insights and challenges for researchers to guide their practice of case study research this is an ideal text for those studying and conducting case study research in education health and social care and related social science disciplines helen simons is professor emeritus of education university of southampton

Case Study Research in Practice

2010

this is the authoritative reference work in the field an interdisciplinary set it investigates the extensive history design and methods of case study research

Encyclopedia of Case Study Research

2005-04-15

the use of case studies to build and test theories in political science and the other social sciences has increased in recent years many scholars have argued that the social sciences rely too heavily on quantitative research and formal models and have attempted to develop and refine rigorous methods for using case studies this text presents a comprehensive analysis of research methods using case studies and examines the place of case studies in social science methodology it argues that case studies statistical methods and formal models are complementary rather than competitive the book explains how to design case study research that will produce results useful to policymakers and emphasizes the importance of developing policy relevant theories it offers three major contributions to case study methodology an emphasis on the importance of within case analysis a detailed discussion of process tracing and development of the concept of typological theories case studies and theory development in the social sciences will be particularly useful to graduate students and scholars in social science methodology and the philosophy of science as well as to those designing new research projects and will contribute greatly to the broader debate about scientific methods

Case Studies and Theory Development in the Social Sciences

1985

aims to provide a general understanding of the case study method as well as specific tools for its successful implementation it breaks down traditional boundaries between qualitative and quantitative experimental and nonexperimental positivist and interpretivist

Case Studies in Accounting. Solutions Manual

1998-07-17

this volume provides extensive applications of actual case study research as well as discussions of how case study research can be applied to broad areas of inquiry each of the applications is designed to help readers identify solutions to problems encountered when doing case study research the book is organized in three parts part i shows how to integrate theoretical concerns into exploratory case studies descriptive case studies or causal case studies and shows how theory can shape the case selection process part ii provides examples from education and management information systems covering important steps in case study research such as how to select the units of analysis how to define the data collections needs and how to establish rival hypotheses finally part iii examines the use of case studies as an evaluative tool including distinctions among different qualitative research strategies and evaluating highly complex interventions

Case Studies in Data Analysis

2007

practical data analysis case studies in business statistics is a collection of 75 class tested case studies for use in introductory business statistics and general statistics all cases are drawn from real situations in a broad range of business economic and social science settings and include small and large data sets for analysis by students the philosophy behind the package is to let the cases and data drive or supplement the course doing so provides three important opportunities for students and instructors useful computing experience hands on activity which is more motivating than the traditional course format and a sense of realism about the use of statistics

Case Study Research

1993-05-25

this textbook provides students with the skills and techniques necessary to analyse business case studies from a strategic perspective with career development and impact in mind the book goes beyond simply listing tools instead teaching students how to prepare for a major strategic business case analysis project how to position their analysis on a spectrum from reductionist to holistic approaches how to critically engage with theory and

case data as well as how to leverage their work after completion a logical approach is offered taking the reader through the analysis journey from preparing to analyse a case study to conducting the analysis and maximising the impact going forwards a comprehensive analysis task is incorporated which asks the reader to reflect on a range of case data understand the choices of analytical positioning and tool selection and develop an analysis based on this positioning further pedagogical features include reflective practice exercises at the end of chapters allowing the student to self identify areas of strength and weakness as they develop through the process worked examples based on cases reproduced in the book allowing the student to follow the analytical process that the author went through in different analysis modes quotes and analysis insights from former students who have previously conducted a strategic business case analysis aiding reflective practice as case study analysis continues as a core component of teaching across business schools this unique text will help to build key skills in advanced undergraduate postgraduate mba and executive education students conducting strategic business case analysis support material includes powerpoint slides as well as video content

Applications of Case Study Research

1998-11
