design is about the creation of meaningful connections to solve problems and advance human wellbeing the discipline has always explored the beneficial links between form and function technology and meaning beauty and utility people and artefacts and problems and solutions among others this book focuses on the crucial connection between design research and design education contemporary society grows increasingly hyper complex and globally competitive this state of affairs raises fundamental questions for both design education and design research should research skills be integrated into undergraduate courses how can we modify design courses without compromising the positive aspects of the educational studio experience can the three cycles of higher education in design be combined into a creative and inquisitive educational continuum to examine the relationship between research and education in design we must address the topic of knowledge keeping in mind that the development and dissemination of new and useful knowledge is the core purpose of a university if we agree that design has its own things to know and ways to find out about them then design knowledge resides in people processes products and philosophy this book explores the intersection of these four areas with the aim of uncovering insights to advance the current state of the design discipline

first published in 1986 we all play the roles of teacher or learner many times in life in school and home on the job and even at play how can we strengthen those roles striving for deep understanding and sound thinking knowledge as design demonstrates the strong but neglected unity between learning and critical and creative thinking author david perkins discloses how the concept of design opens a doorway into a deeper exploration of any topic academic or every day knowledge as design challenges the concept of knowledge as information drawing from current philosophy and cognitive science the book shows how learners can attain a new level of insight when learning highlights the constructed and constructive character of knowledge any individual involved in formal or informal learning or teaching can benefit from the general outlook and specific principles laid out in this book it offers a uniquely intelligent philosophy and psychology of understanding and critical and creative thinking
