brown and rainbow trout in most of the east's accessible cold waterways searching for home waters is part science part environmental history and part personal journey of the author michael k steinberg and those he interviewed during his travels the work takes a broad perspective that examines the status of brook trout in the eastern united states employing a landscape approach in other words brook trout do not exist in a vacuum they are impacted by logging agriculture fishing policies suburban development mining air pollution and climate change thus while the book focuses specifically on the status and management of the brook trout from georgia to labrador it also tells the larger story of the status of the eastern environment as a pilgrimage this book is also a journey of the heart and contains steinberg's personal reflections on his relationship with the brook trout and its geography in casting seaward author naturalist and educator steve ramirez expands beyond the geographical scope of his first two books by traveling thousands of miles by plane motor vehicle boat and foot pursuing the native gamefish of north america's salt and brackish water habitats this journey includes following anadromous fish like salmon from the ocean's depth to the shallowest tributaries of alaskan rivers and following rivers and streams from their freshwater sources to their brackish water deltas in the course of this journey ramirez explores and fishes portions of the entire american coastline from the northern atlantic coast to the caribbean sea the gulf of mexico and up the pacific coast from california to alaska the entirety of this sojourn was written while traveling through the covid 19 pandemic and it touches on the lessons that challenges such as global pandemics global ecological and sociological disruption and global opportunities for positive learning and change can teach us about nature and human nature most of all casting seaward is a celebration of the bounty and beauty of our water covered planet and a recognition of its increasingly rarefied qualities each story is told in part through the eyes of the people who have lived alongside and come to love these waters and fish woven throughout these adventures are the stories of the people he meets and befriends while pursuing a mutual love of nature and the best of human nature as the first criterion for finding common ground casting seaward is an enthralling exploration an insightful warning and call to action and an exceedingly hopeful story in an all too often seemingly hopeless time it is a story of fishing and friendship it is a story of humanity's impact on nature and nature's impact on humanity it is our story in this pivotal moment in the history of humanity and the living blue planet we call home field stream america's largest outdoor sports magazine celebrates the outdoor experience with great stories compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations the first coffee table type book dedicated to america's premier freshwater big game fish a handsome full color volume which accurately depicts the life history research lore and mystique that surround the fascinating muskellunge the best known names in the world of the muskellunge today have teamed up to provide a highly informative and colorful text expert biologists historians and fishermen share their knowledge for this definitive look at the musky from aboriginal use through modern day musky country explores the great risks relationship with man u s presidents and hollywood starlets have found themselves drawn into the culture that is musky fishing strikingly illustrated with full color and historic photographs whether you want to hang a trophy bass or musky on your wall or just want to spend a few quiet hours catching panfish with your kids this book is the essential guide to fishing in southern wisconsin author bob riepenhoff outdoor editor for the milwaukee journal sentinel for fourteen years wrote a column called riepenhoff on local lakes this collection of forty three of those columns covers fifty four lakes in southern wisconsin riepenhoff describes his fishing experiences and methods and provides information about the fish species in each lake fish stocking management special regulations and public access he draws on the expertise of the most skilled

Mid Atlantic Fly Fishing Guide 2023-10-17 cicadas are large loud insects that spend their nymphal stages underground until they crawl out climb a tree trunk and emerge as winged insects the adult insects emerge on a 1 year annual and 13 or 17 year periodical cadence yearly emergences are consistent and plentiful in certain places east to west and become a dependable hatch species from carp and smallmouth bass on eastern rivers to trout on fabled waters such as utah s green river or pennsylvania s spring creek grow fat on this annual feast but the feeding frenzy kicks into high in most years when a brood of periodical cicadas emerge in their predictable range these insects have been

underground for 13 or 17 years identified by different brood names and emerge en masse in mind boggling numbers many of them take to trees along highways or deep in the woods where their call is deafening and animals from birds to snakes to turkeys feed voraciously on them millions of cicadas also emerge at the bases of the trees and bushes that line streams and lakes and they fall into the water so regularly that fish become attuned to them even fish that are not designed to feed on the surface such as carp catfish and freshwater drum contort their bodies to take part in this daily buffet which lasts for about a month anglers can follow this hatch and fish cicadas for almost two months and if they understand which broods are hatching where can fish cicadas almost every year this is the first book dedicated to the patterns techniques and most important the science of locating the best hatches of these insects
