in this book professor lusztig solves an interesting problem by entirely new methods specifically the use of cohomology of buildings and related complexes the book gives an explicit construction of one distinguished member $d \nu$ of the discrete series of $GL_n F_q$ where ν is the n dimensional F vector space on which $GL_n F_q$ acts this is a p adic representation more precisely $d \nu$ is a free module of rank $q - 1$ over the ring of witt vectors $W(F)$ of F in chapter 1 the author studies the homology of partially ordered sets and proves some vanishing theorems for the homology of some partially ordered sets associated to geometric structures chapter 2 is a study of the representation of the affine group over a finite field in chapter 3 $d \nu$ is defined and its restriction to parabolic subgroups is determined in chapter 4 the author computes the character of $d \nu$ and shows how to obtain other members of the discrete series by applying galois automorphisms to $d \nu$ applications are in chapter 5 as one of the main applications of his study the author gives a precise analysis of a brauer lifting of the standard representation of $GL_n F_q$

the close of the seven years war brought only a lull in the great conflicts of the eighteenth century and yet for a time men seemed less influenced by dynastic quarrels and their attention was centered upon questions of social and political reconstruction

the policies of rulers were affected by these newer interests they tried to make an end of crying abuses or at least to simplify their administrative systems and to remove troublesome obstacles to the exercise of their authority in the last years of the century the timid plans of monarchical reform in france were thrust aside by a popular revolution which aimed to reorganize society according to the principle of equality the same principle of reorganization was carried beyond the ancient frontiers of france when war broke out and victorious french armies sought to enlarge the borders of the nation or to impose the national institutions upon dependent peoples before the period closed with the downfall of napoleon and the settlement of 1815 these two forces of monarchical reform and revolutionary action had worked many changes in the structure of european society
