The Oxford Handbook of Ellipsis

2019

this handbook is the first volume to provide a comprehensive in depth and balanced discussion of ellipsis a phenomena whereby expressions in natural language appear to be incomplete but are still understood it explores fundamental questions about the workings of grammar and provides detailed case studies of inter and intralinguistic variation

Advances in Iranian Linguistics II

2023-04-15

this volume offers insight into different aspects of an interesting but fairly understudied language family opens a path to new inquiries and provides valuable contribution to linguistics in general and to iranian linguistics in particular the articles in this volume offer novel analyses of significant properties of some of the iranian languages and contribute to various linguistic subareas such as experimental and historical linguistics as well as the morphology syntax and semantics of several members of this language family specifically this volume features a few articles on the ezafe construction which shed new light on this interesting phenomenon of western iranian languages from historical comparative and syntactic points of view moreover a few articles address the syntax and formal semantics of properties of persian offering new insight into particular constructions in this language which are also fruitful for the general theory of linguistics crucially all authors raise important questions opening up the path for further investigations

Communicating through Vague Language

2016-04-29

this book is a comparative study of vague language based on naturally occurring data of L1 and L2 speakers in academic settings it explores how L2 learners have diverse and culturally specific needs for vague language compared with L1s and are generally vaguer

The Oxford Handbook of Languages of the Caucasus

2020

the oxford handbook of languages of the caucasus is an introduction to and overview of the linguistically diverse languages of southern russia georgia azerbaijan and armenia though the languages of the caucasus have often been mischaracterized or exoticized many of them have cross linguistically rare features found in few or no other languages this handbook presents facts and descriptions of the languages written by experts the first half of the book is an introduction to the languages with the linguistic profiles enriched by demographic research about their speakers it features overviews of the main language families as well as detailed grammatical descriptions of several individual languages the second half of the book delves more deeply into theoretical analyses of features such as agreement ellipsis and discourse properties which are found in some languages of the caucasus promising areas for future research are highlighted throughout the handbook which will be of interest to linguists of all subfields

Advances in Iranian Linguistics

2020-07-15

this volume brings together selected papers from the first north american conference in iranian linguistics which was organized by the linguistics department at stony brook university papers were selected to illustrate the range of frameworks diverse areas of research and how the boundaries of linguistic analysis of iranian languages have expanded over the years the contributions collected in this volume address advancing research and complex methodological explorations in a broad range of topics in persian syntax morphology phonology semantics typology and classification as well as historical linguistics some of the papers also investigate less studied and endangered iranian languages such as tat gilaki and mazandarani sorani and kurmanji kurdish and zazaki the volume will be of value to scholars in theoretical frameworks as well as those with typological and diachronic perspectives and in particular to those working in iranian linguistics

Ellipsis

1995-06-22

this book elaborates a theory of ellipsis that sheds new light on a well known phenomenon bringing it under the aegis of general and universal principles lobeck argues that ellipted categories in ip vp ellipsis dp n ellipsis and cp sluicing are empty non referential pronominals subject to the same licensing and identification conditions as referential pro she proposes that both types of empty pronominals must be licensed under head government to satisfy the empty category principle and identified through strong agreement in the case of ellipsis agreement type features make the empty category visible to interpretive processes of reconstruction these licensing and identification conditions derive the result that ellipses are complements of functional categories det comp and infl but not of lexical categories the analysis is supported by contrastive evidence from ellipsis in french and german in which licensing and identification interact with verb raising feature checking and a parameter defining strong agreement

ICCoLLiC 2020

2020-10-23

iccollic is an international conference hosted by the english department faculty of cultural sciences universitas sebelas maret this conference is arranged to become an annual conference making room for scholars and practitioners in the area of communication language literature and culture to share their thoughts knowledge and recent researches in the field of study

Rarely Used Structures and Lesser-Studied Languages

2019-08-29

this book investigates a set of marginal syntactic structures which have been singularly influential in the development of generative theory spotlighting lesser studied languages of the indic family while emphasizing implications for linguistic theory more broadly after first defining what constitutes a marginal syntactic structure this book then undertakes a micro comparative approach to the rigorous exploration of fundamental properties of human language including displacement ellipsis unbounded dependencies and the role of clausal peripheries in such languages as kashmiri and romani in so doing manetta interrogates and ultimately affirms the relevance of marked and marginal strings which have proven to be crucial to generative syntax while simultaneously advocating for the role of lesser studied languages to the study of such properties this book is key reading for graduate students and

researchers in linguistics and syntax more specifically as well as those interested in the study of indic languages

The Derivational Timing of Ellipsis

2022-03-31

this volume explores the nature of ellipsis the core phenomenon that results in various types of omission in sentences the chapters adopt the popular silent structure accounts of ellipsis and investigate the question of when linguistic material becomes silenced during the derivation and realization of syntactic structure the book begins with a detailed introduction from the editors that outlines the current generative syntactic approaches to the derivational timing of ellipsis in the chapters that follow internationally recognized experts in the field address key topics including structure building the architecture of grammar the interaction of distinct modules with syntax the order of operations in the post syntactic component and constraints on binding relations the authors also present novel arguments for and against the derivational approaches to ellipsis the licensing of ellipsis and phonological constraints on elliptical sentences the findings based on data from english and other languages such as armenian italo romance ossetic spanish taiwanese and turkish facilitate a deeper understanding of the interaction between syntax and the neighbouring modules in the formation of elliptical utterances

بين الاقوامى غالب سمنار

1970

the hungarian nominal functional sequence combines the methods of syntactic cartography with evidence from compositional semantics in a comprehensive exploration of the structure of noun phrases proceeding from the lexical core to the top of dp it uses hungarian as a window on the underlying universal functional hierarchy of noun phrases but it also regularly complements and supports the analysis with cross linguistic evidence the book works out a minimal map of the extended np in the sense that the proposed hierarchy only has projections which host overt material and it does not draw on semantically empty word order projections topics which receive special attention include the syntax of classifiers demonstratives proper names possessive nps and plural pronouns

The Hungarian Nominal Functional Sequence

2021-03-09

trends in hindi linguistics provides a snapshot of current developments in hindi syntax and semantics and covers topics such as definiteness marking comparative constructions with differentials conjunct verbs participial relative clauses ellipsis scrambling infinitives and directive strategies together these papers give a rich and in depth account of the vitality of current research on hindi

A Contrastive Analysis of Persian & English and Error Analysis

2004

the bloomsbury companion to islamic studies is a comprehensive one volume reference guide to islam and study in this area a team of leading international scholars muslim and non muslim cover important aspects of study in the field providing readers with a complete and accessible source of information to the wide range of methodologies and theoretical principles involved presenting islam as a variegated tradition key essays from the contributors demonstrate how it is subject to different interpretations with no single version privileged in this volume islam is treated as a lived experience not only as theoretical ideal or textual tradition featuring a series of indispensable research tools including a substantial a z of key terms and concepts chronology and a detailed list of resources this is the essential reference guide for anyone working in islamic studies

Trends in Hindi Linguistics

2018-09-10

this volume containing papers read at the third peshitta symposium brings together biblical studies and syriac liturgy and patristic literature it discusses the patristic and liturgical evidence for the syriac versions as well as their reception in the syriac churches

Journal of Linguistics

2008
