this 1877 work sketches cyriot history and customs as well as describing discoveries made by a controversial italian american amateur archaeologist this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant at its height the khmer empire stretched from angkor as far west as muang singh on the border with present day burma and thailand and

as far north as wat phu on the banks of the mekong river following on from the great success of angkor cities and temples the renowned scholar and epigraphist claude jacques explores the achievements and developments of the khmer people from the 5th to the 13th century beginning with the early pre angkorean site of funan and ending with the reign of the great khmer king jayavarman vii the author journeys behind the well known temples of angkor wat to reveal the marvels of many temples hitherto inaccessible to visitors thus the reader is taken a virtual tour of sites as varied as preah vihear perched on a steep cliff overlooking the cambodian plain the mysterious and extensive site of preah khan of kompong svay and the exquisitely carved temple in the forest of beng mealea to mention but a few the author speculates as to the origins and reasons behind each site and how the khmer empire functioned over many hundreds of years superbly photographed by philippe lafond the book includes site plans old photographs aerial shots of the ancient cities as well as detailed photographs showing the reliefs and other magnificent carvings never before has the richness and diversity of the khmer empire been captured so evocatively this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant illustrations numerous b w illustrations description ananda k coomaraswamy s early indian architecture is a study of the subject based mainly on the information as available in early pali literature and as represented in the reliefs of bharhut sanchi and amaravati the work is divided into two parts part i deals with cities and city gates etc while part ii is on the bodhi gharas i e representations of the bodhi tree with or without a temple structure coomaraswamy has assembled the data systematically and in the process brought out details not only from literature but also from sculptural representations he has confined himself not only to the early texts and material but also has made use of information from later examples particularly forts etc the details about the lay out of early cities alongwith their different components architectural terms as available in early texts and illustrations with copious notes on each have made this work invaluable for those interested in serious study of the subject this monograph is a must for students of archaeology including art and architecture when thinking about psalms and prayers in the second temple period the masoretic psalter and its reception is often given priority because of modern academic or theological interests this emphasis tends to skew our understanding of the corpus we call psalms and prayers and often dampens or mutes the lived context within which these texts were composed and used this volume is comprised of a collection of articles that explore the diverse settings in which psalms and prayers were used and circulated in the late second temple period the book includes essays by experts in the hebrew bible the dead sea scrolls apocrypha and pseudepigrapha and the new testament in which a wide variety of topics approaches and methods both old and new are utilized to explore the many functions of psalms and prayers in the late second temple period included in this volume are essays examining how psalms were read as prophecy as history as liturgy and as literature a variety methodologies are employed and include the use of cognitive sciences and poetics linguistic theory psychology redaction criticism

and literary theory spanning a period of more than a thousand years myanmar architecture captures in architecture the historical essence of a rich culture influenced by trade buddhism and colonialism from ruined temples that are all that remain of the long lost pyu to the magnificent richness of the bejeweled golden form of the shwedagon pagoda myanmar is home to some of the most magnificent structures ever built experience the splendid ruins dotting the plains of mrauk u or step into bagan the kingdom of the four thousand temples visit ratnapura amarapura and yadanabon to marvel at the history behind the facades of these royal cities explore the traditions that dictate every fine detail in the design construction and decoration of palaces places of worship and even common homes see how colonial influences have left their mark in the modern cities of mandalay yangon and mawlamyine gain an insight into the rich traditions culture and history of a country long hidden from prying eyes through a rare chance to discover the secrets and architectural treasures of myanmar about the author ma thanegi was born in myanmar and educated at the methodist english high school the state school of fine arts and the institute of economics she is a painter who has exhibited with group shows since 1967 and has had seven exhibitions of her own she is a contributing editor at and editor of the myanmar times an english language weekly enchanting myanmar a travel magazine she lives in yangon myanmar the central character in susan naquin's extraordinary new book is the city of peking during the ming and qing periods using the city's temples as her point of entry naquin carefully excavates peking's varied public arenas the city's transformation over five centuries its human engagements and its rich cultural imprint this study shows how modern beijing's glittering image as china's great and ancient capital came into being and reveals the shifting identities of a much more complex past one whose rich social and cultural history naquin splendidly evokes temples by providing a place where diverse groups could gather without the imprimatur of family or state made possible a surprising assortment of community building and identity defining activities by revealing how religious establishments of all kinds were used for fairs markets charity tourism politics and leisured sociability naquin shows their decisive impact on peking and at the same time illuminates their little appreciated role in chinese cities generally lacking most of the conventional sources for urban history she has relied particularly on a trove of commemorative inscriptions that express ideas about the relationship between human beings and gods about community service and public responsibility about remembering and being remembered the result is a book that will be essential reading in the field of chinese studies for years to come kalighat is said to be the oldest and most potent hindu pilgrimage site in the city of kolkata formerly calcutta it is home to the dark goddess kali in her ferocious form and attracts thousands of worshipers a day many sacrificing goats at her feet in the making of a modern temple and a hindu city deonnie moodie examines the ways middle class authors judges and activists have worked to modernize kalighat over the past long century rather than being rejected or becoming obsolete with the arrival of british colonialism and its accompanying iconoclastic protestant ideals the temple became a medium through which middle class hindus could produce and publicize their modernity as well as the modernity of their city and nation that trend continued and even strengthened in the wake of india's economic liberalization in the 1990s kalighat is a superb example of the ways hindus work to modernize india while also indianizing modernity through hinduism's material forms moodie explores both middle class efforts to modernize kalighat and the lower class's resistance to those efforts conflict between class groups throws into high relief the various roles the temple plays in peoples lives and explains why the modernizers have struggled to bring their plans to fruition the making of a modern temple and a hindu city is the first scholarly work to juxtapose and analyze processes of historiographical institutional and physical modernization of a hindu temple this milestone study is a thorough examination of the various cultic and

social phenomena connected with the temple activities connected with the temple s inner sphere and belonging to the priestly circle the book also seeks to demonstrate the antiquity and the historical timing of the literary crystallization of the priestly material found in the pentateuch contents prologue the israelite temples temples and open sacred places the priesthood and the tribe of levi the aaronites and the rest of the levitical tribe the distribution of the levitical tribe the centralizations of the cult the priestly image of the tabernacle grades of sanctity in the tabernacle temple and tabernacle the ritual complex performed inside the temple incense of the court and of the temple interior the symbols of the inner sanctum the non priestly image of the tent of mo ed the emptying of the inner sanctum pilgrim feasts and family festivals and the passover sacrifice dear traveler welcome to the wanderstories tour of the city god temple in shanghai we are now ready to take you on your personal tour of this world famous landmark we at wanderstories are storytellers we don t tell you where to eat or sleep we don t intend to replace a typical travel reference guide our mission is to be the best local guide that you would wish to have by your side when visiting the sights so we meet you at the sight and take you on a tour wanderstories travel guides are unique because our storytelling style puts you alongside the best local guide who tells you fascinating stories and unusual facts recreating the passion and sacrifice that forged the beauty of these places right here in front of you while a wealth of high quality photos historic pictures and illustrations brings your tour vividly to life our promise when you visit the city god temple with this travel guide you will have the best local guide at your fingertips when you read this travel guide in the comfort of your armchair you will feel as if you are actually visiting the city god temple with the best local guide let s go your guide wanderstories this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant indian air force airmen x y group technical non technical trades exam 25 practice sets 1500 mcq ans with explanation each set covers 4 subjects english mathematics physics reasoning general awareness raga based on the latest syllabus nature of questions the neokoroi or temple wardens were hellenized cities of the eastern roman empire who received that title for possessing their provinces temples to the living emperor this work collects and analyzes all the evidence for the neokoroi including their coins and inscriptions contemporary and subsequent historical texts and the archaeological remains of the temples themselves and the statues that stood within them there were at least thirty seven neokoroi and each is examined in a separate chapter the results are then re analyzed chronologically clarifying the development of the institution finally the statues temples cities and provinces are compared resulting in new insights into the rivalry and hierarchy among the cities and the dialogue of worship that related them to their roman overlords the temples of kyoto takes you on a journey through these environs and presents twenty one of these marvelous structures that are unique creations which while quintessentially japanese somehow speak a universal language readily appreciated by people the world over donald richie called by time magazine the dean of art critics

in japan turns his attention to these twenty one temples with scholarship and an eye for the dramatic drawing off such classic sources as the tale of genji and essays in idleness he takes the reader on a tour through the ages first with a comprehensive history of japanese buddhism and then by highlighting key events in the development of these celestial seeming cities brilliant photographs of the temples taken by the award winning photographer alexandre georges complement the text and provide a visual overview of the subject matter his keen eye captures on film the elements that make each temple noteworthy including their interiors and objets d art in a fresh and thought provoking manner the result is this book a testament and meditation on the power and elegance of these world renowned structures that are both places of worship and examples of the finest art japan has ever produced this is the first comparative study of roman architecture on the iberian peninsula covering six centuries from the arrival of the romans in the third century b c until the decline of urban life on the peninsula in the third century a d during this period the peninsula became an influential cultural and political region in the roman world iberia supplied writers politicians and emperors a fact acknowledged by romanists for centuries though study of the peninsula itself has too often been brushed aside as insignificant and uninteresting in this book william e mierse challenges such a view by examining in depth the changing forms of temples and their placement within the urban fabric mierse shows that architecture on the peninsula displays great variation and unexpected connections it was never a slavish imitation of an imported model but always a novel experiment sometimes the architectural forms are both new and unexpected in some cases specific prototypes can be seen but the iberian form has been significantly altered to suit local needs what at first may seem a repetition of forms upon closer investigation turns out to be theme and variation mierse brings to his quest an impressive learning including knowledge of several modern and ancient languages and the archaeology of the roman east which allows him a unique perspective on the interaction between events and architecture the mayan civilization was a mesoamerican civilization founded by the maya peoples it was noted for its hieroglyphic script the only known fully developed writing system of the pre columbian americas and its art architecture mathematics calendar and astronomical design since the 1990s what were once considered mysterious ruins in mexico have been reconstructed by archaeologist winslow bradford the complex structures were made of lime plastered mud bricks with an internal wood framework supporting heavy loads and a stone foundation below mayan temples were a place for playing games holding feasts and rituals involving human sacrifice the maya people built pyramids as places to worship their gods these pyramids usually had several smaller temples on top to honor their gods worshippers would climb the steep steps up to the temple at the top of the pyramid to leave gifts and pray some pyramids also had sacred stairways or ramps leading up to them you might be interested to learn that the mayan civilization was a mesoamerican civilization established by the maya peoples and renowned for its hieroglyphic script the only known fully developed language system of the pre columbian americas as well as for its architectural design engineering mathematics calendar and astronomical design mayans were a mesoamerican civilization living in what is now guatemala honduras and parts of mexico they are believed to have had some contact with the olmecs who preceded them in mexico their culture ultimately became more complex than other nearby civilizations such as teotihuacan in today s mexico city zapotec in today s oaxaca or tula in today s hidalgo the rise and fall of these three kingdoms left behind massive monuments still standing today that had survived centuries without being covered by new civilizations coming in on top of them like happened at many other sites around mexico central america where older buildings were simply built over when newer ones came along later on top of them the vision for this impressive work on temple architecture in the levant grew out of the author s work on roman temple designs on the iberian peninsula and continual references to semitic influences on the designs

of sanctuaries both on the peninsula and in north africa it was assumed that phoenician colonization had brought with it the full flowering of levantine architectural forms as miersse began to search for relevant material on the ancient levant however he discovered that no overall synthesis had ever been written and it was virtually impossible to recognize and isolate semitic elements in architectural forms this book addresses this need the analysis presented here is comparative and follows the methodology most commonly employed by architectural historians throughout the twentieth century it is a formalist approach and permits the isolation of lines of continuity and the detection of discontinuity while miersse relies heavily on this traditional method he also introduces some approaches from the postprocessual school of archaeology in its attempts to discern an appropriate way for cult to be investigated by archaeology the sanctuaries that this book presents were erected between the end of the late bronze age conventionally assigned the date of 1200 b c e and the annexation of the levantine region into the assyrian empire when mesopotamia again became highly influential in the region the topic concerns temples that were produced during the period when the levant was its own entity and politically independent of egypt mesopotamia or anatolia during this period the designs chosen for inclusion in this book must reflect local choices rather than resulting from imposed outside concepts the architecture that emerged in the wake of the downfall of the late bronze age and the subsequent reemergence of social cohesiveness manifested significant changes in form and function the five centuries under review reveal exciting developments in sacred architecture and show that although the architects of the first millennium b c e maintained important lines of continuity with the developments of the previous two millennia they were also capable of creating novel forms to meet new needs included in this fascinating volume are 90 pages of photos drawings floor plans and maps history book the temple scroll and related texts one of the series companion to the qumran scrolls is a comprehensive roadmap to the temple scroll the longest and one of the most complex of the manuscripts from qumran the central chapter contains a discussion of the contents of the temple scroll including sections on the temple and its courts purity regulation the festival calendar and the deuteronomic paraphrase with the law of the king the companion also includes a chapter on the description of the new jerusalem as well as one on the relationship of the temple scroll to the book of jubilees 4qmiqsat ma aseh ha torah and the damascus document written in accessible language and featuring extensive bibliographies this companion is ideal for undergraduate and graduate classes destruction of temples and their transformation into churches are central symbols of change in religious environment socio political system and public perception in late antiquity archaeologists historians and historians of religion seek an appropriate larger perspective on the phenomenon a oetemple destructiona in rio de janeiro the spiritual home of world football and buenos aires where a popular soccer club president was recently elected mayor the game is an integral part of national identity using the football stadium as an illuminating cultural lens temples of the earthbound gods examines many aspects of urban culture that play out within these monumental architectural forms including spirituality violence rigid social norms anarchy and also expressions of sexuality and gender tracing the history of the game in brazil and argentina through colonial influences as well as indigenous ball courts in mayan aztec zapotec mixtec and olmec societies christopher gaffney s study spans both ancient and contemporary worlds linking the development of stadiums to urbanization and the consolidation of nation building in two of latin america s most intriguing megacities the most comprehensive account yet of the human past from prehistory to the present oskar skarsaune gives us a new look into the development of the early church and its practice by showing us the evidence of interaction between the early christians and rabbinic judaism he offers numerous fascinating episodes and glimpses into this untold story stephen covell addresses fully contemporary

buddhist life and institutions topics often overlooked in the conflict between the rhetoric of renunciation and the practices of clerical marriage and householding that characterise much of buddhism in today s japan at the start of the twentieth century the korean buddhist tradition was arguably at the lowest point in its 1 500 year history in the peninsula discriminatory policies and punitive measures imposed on the monastic community during the chosŏn dynasty 1392 1910 had severely weakened buddhist institutions prior to 1895 monastics were prohibited by law from freely entering major cities and remained isolated in the mountains where most of the surviving temples and monasteries were located in the coming decades profound changes in korean society and politics would present the buddhist community with new opportunities to pursue meaningful reform the central pillar of these reform efforts was p ogyo the active propagation of korean buddhist teachings and practices which subsequently became a driving force behind the revitalization of buddhism in twentieth century korea from the mountains to the cities traces p ogyo from the late nineteenth to the early twenty first century while advocates stressed the traditional roots and historical precedents of the practice they also viewed p ogyo as an effective method for the transformation of korean buddhism into a modern religion a strategy that proved remarkably resilient as a response to rapidly changing social political and legal environments as an organizational goal the concerted effort to propagate buddhism conferred legitimacy and legal recognition on buddhist temples and institutions enabled the buddhist community to compete with religious rivals especially christian missionaries and ultimately provided a vehicle for transforming a mountain buddhism tradition as it was pejoratively called into a more accessible and socially active religion with greater lay participation and a visible presence in the cities ambitious and meticulously researched from the mountains to the cities will find a ready audience among researchers and scholars of korean history and religion modern buddhist reform movements in asia and those interested in religious missions and proselytization more generally paul s view of the church as the temple and his concern about its purity in 1 2 corinthians has traditionally been interpreted from the perspective of a jewish background however yulin liu reveals that the pagans were very aware of temple purity when visiting some temples in the greco roman world and the purification concerns of three pagan temples in corinth are documented in his work the author affirms that the gentile believers among the corinthian community were able to grasp paul s message because of it also liu investigates paul s use of temple purity to address the necessity of unity holiness and faithfulness of the corinthian christians in an eschatological sense the separation of god s people from profane matters actually points to a new exodus and a progressive consummation of the construction of the eschatological temple community

the temples of kyoto takes you on a journey through these environs and presents twenty one of these marvelous structures that are unique creations which while quintessentially japanese somehow speak a universal language readily appreciated by people the world over donald richie called by time magazine the dean of art critics in japan turns his attention to these twenty one temples with scholarship and an eye for the dramatic drawing off such classic sources as the tale of genji and essays in idleness he takes the reader on a tour through the ages first with a comprehensive history of japanese buddhism and then by highlighting key events in the development of these celestial seeming cities brilliant photographs of the temples taken by the award winning photographer alexandre georges complement the text and provide a visual overview of the subject matter his keen eye captures on film the elements that make each temple noteworthy including their interiors and objets d art in a fresh and thought provoking manner the result is this book a testament and meditation on the power and elegance of these world renowned structures that are both places of worship and examples of the finest art japan has ever produced

The Making of a Modern Temple and a Hindu City

2018-11-06

this is the first comparative study of roman architecture on the iberian peninsula covering six centuries from the arrival of the romans in the third century b c until the decline of urban life on the peninsula in the third century a d during this period the peninsula became an influential cultural and political region in the roman world iberia supplied writers politicians and emperors a fact acknowledged by romanists for centuries though study of the peninsula itself has too often been brushed aside as insignificant and uninteresting in this book william e miersse challenges such a view by examining in depth the changing forms of temples and their placement within the urban fabric miersse shows that architecture on the peninsula displays great variation and unexpected connections it was never a slavish imitation of an imported model but always a novel experiment sometimes the architectural forms are both new and unexpected in some cases specific prototypes can be seen but the iberian form has been significantly altered to suit local needs what at first may seem a repetition of forms upon closer investigation turns out to be theme and variation miersse brings to his quest an impressive learning including knowledge of several modern and ancient languages and the archaeology of the roman east which allows him a unique perspective on the interaction between events and architecture

Temples and Temple-service in Ancient Israel

1985

the mayan civilization was a mesoamerican civilization founded by the maya peoples it was noted for its hieroglyphic script the only known fully developed writing system of the pre columbian americas and its art architecture mathematics calendar and astronomical design since the 1990s what were once considered mysterious ruins in mexico have been reconstructed by archaeologist winslow bradford the complex structures were made of lime plastered mud bricks with an internal wood framework supporting heavy loads and a stone foundation below mayan temples were a place for playing games holding feasts and rituals involving human sacrifice the maya people built pyramids as places to worship their gods these pyramids usually had several smaller temples on top to honor their gods worshippers would climb the steep steps up to the temple at the top of the pyramid to leave gifts and pray some pyramids also had sacred stairways or ramps leading up to them you might be interested to learn that the mayan civilization was a mesoamerican civilization established by the maya peoples and renowned for its hieroglyphic script the only known fully developed language system of the pre columbian americas as well as for its architectural design engineering mathematics calendar and astronomical design mayans were a mesoamerican civilization living in what is now guatemala honduras and parts of mexico they are believed to have had some contact with the olmecs who preceded them in mexico their culture ultimately became more complex than other nearby civilizations such as teotihuacan in today s mexico city zapotec in today s oaxaca or tula in today s hidalgo the rise and fall of these three kingdoms left behind massive monuments still standing today that had survived centuries without being covered by new civilizations coming in on top of them like happened at many other sites around mexico central america where older buildings were simply

built over when newer ones came along later on top of them

City God Temple in Shanghai

2013-07-04

the vision for this impressive work on temple architecture in the levant grew out of the author s work on roman temple designs on the iberian peninsula and continual references to semitic influences on the designs of sanctuaries both on the peninsula and in north africa it was assumed that phoenician colonization had brought with it the full flowering of levantine architectural forms as mierserowland began to search for relevant material on the ancient levant however he discovered that no overall synthesis had ever been written and it was virtually impossible to recognize and isolate semitic elements in architectural forms this book addresses this need the analysis presented here is comparative and follows the methodology most commonly employed by architectural historians throughout the twentieth century it is a formalist approach and permits the isolation of lines of continuity and the detection of discontinuity while mierserowland relies heavily on this traditional method he also introduces some approaches from the postprocessual school of archaeology in its attempts to discern an appropriate way for cult to be investigated by archaeology the sanctuaries that this book presents were erected between the end of the late bronze age conventionally assigned the date of 1200 b c e and the annexation of the levantine region into the assyrian empire when mesopotamia again became highly influential in the region the topic concerns temples that were produced during the period when the levant was its own entity and politically independent of egypt mesopotamia or anatolia during this period the designs chosen for inclusion in this book must reflect local choices rather than resulting from imposed outside concepts the architecture that emerged in the wake of the downfall of the late bronze age and the subsequent reemergence of social cohesiveness manifested significant changes in form and function the five centuries under review reveal exciting developments in sacred architecture and show that although the architects of the first millennium b c e maintained important lines of continuity with the developments of the previous two millennia they were also capable of creating novel forms to meet new needs included in this fascinating volume are 90 pages of photos drawings floor plans and maps

stephen covell addresses fully contemporary buddhist life and institutions topics often overlooked in the conflict between the rhetoric of renunciation and the practices of clerical marriage and householding that characterise much of buddhism in today s japan

Lost Cities and Ancient Temples of Mesoamerica

2012-10-08

at the start of the twentieth century the korean buddhist tradition was arguably at the lowest point in its 1 500 year history in the peninsula discriminatory policies and punitive measures imposed on the monastic community during the chosŏn dynasty 1392 1910 had severely weakened buddhist institutions prior to 1895 monastics were prohibited by law from freely entering major cities and remained isolated in the mountains where most of the surviving temples and monasteries were located in the coming decades profound changes in korean society and politics would present the buddhist community with new opportunities to pursue meaningful reform the central pillar of these reform efforts was p ogyo the active propagation of korean buddhist teachings and practices which subsequently became a driving force behind the revitalization of buddhism in twentieth century korea from the mountains to the cities traces p ogyo from the late nineteenth to the early twenty first century while advocates stressed the traditional roots and historical precedents of the practice they also viewed p ogyo as an effective method for the transformation of korean buddhism into a modern religion a strategy that proved remarkably resilient as a response to rapidly changing social political and legal environments as an organizational goal the concerted effort to propagate buddhism conferred legitimacy and legal recognition on buddhist temples and institutions enabled the buddhist community to compete with religious rivals especially christian missionaries and ultimately provided a vehicle for transforming a mountain buddhism tradition as it was pejoratively called into a more accessible and socially active religion with greater lay participation and a visible presence in the cities ambitious and meticulously researched from the mountains to the cities will find a ready audience among researchers and scholars of korean history and religion modern buddhist reform movements in asia and those interested in religious missions and proselytization more generally

Temples and Sanctuaries from the Early Iron Age Levant

1706

paul s view of the church as the temple and his concern about its purity in 1 2 corinthians has traditionally been interpreted from the perspective of a jewish background however yulin liu reveals that the pagans were very aware of temple purity when visiting some temples in the greco roman world and the purification concerns of three pagan temples in corinth are documented in his work the author affirms that the gentile believers among the corinthian community were able to grasp paul s message because of it also liu investigates paul s use of temple purity to address the necessity of unity holiness and faithfulness of the corinthian christians in an eschatological sense the separation of god s people from profane matters actually points to a new exodus and a progressive consummation of the construction of the eschatological temple community
