speech recognition and digital signal processing this second volume includes contributions from leading researchers in the field on such topics as gabor's signal expansion sampling in optical image formation linear prediction theory polar and spiral sampling theory interpolation from nonuniform samples an extension of papoulis's generalized sampling expansion to higher dimensions and applications of sampling theory to optics and to time frequency representations the exhaustive bibliography on shannon sampling theory will make this an invaluable research tool as well as an excellent text for students planning further research in the field the third and last installment of the social hill series in 1987 skeletal remains were encountered during excavation just west of old fort erie in ontario's niagara peninsula while possession of the land had been bitterly contested in 1814 it remained virtually undeveloped and only in the 1980s with the construction of permanent homes did excavations yield evidence of the distant past an international team of scholars and scientists investigated the remains and identified the individuals nationalities for repatriation where appropriate the resulting archaeological dig has proven crucial to our understanding of the siege of fort erie and provided new information about military clothing personal gear medical science and other details of the day to day life of a soldier living under battlefield conditions during the war of 1812 snake hill provides a detailed account of this investigation documenting an important story of suffering and carnage and providing the reader with a rare glimpse at life and death during the war of 1812 this book contributes significantly to our understanding of events before during and
