work that writing center professionals both new and seasoned are likely to encounter it is structured for use in diverse institutional settings providing both current knowledge as well as case studies of specific settings that represent the types of challenges and possible outcomes writing center professionals may experience this blend of theory with actual practice provides a multi dimensional view of writing center work in the end this book serves not only as a resource but also as a guide to future directions for the writing center which will continue to evolve in response to a myriad of new challenges that will lie ahead

Applied Evolutionary Psychology

2012-02-09

infants and children are the often ignored heroes when it comes to understanding human evolution evolutionary pressures acted upon the young of our ancestors more powerfully than on adults and changes over the course of development in our ancestors were primarily responsible for the species and the people we have become this book takes an evolutionary developmental perspective emphasizing that developmental plasticity the ability to change our physical and

psychological selves early in life is the creative force in evolution with natural selection serving as a filter eliminating novel developmental outcomes that did not benefit survival this book is about becoming of becoming human and of becoming mature adults bjorklund asks how can an understanding of human development help us better understand human evolution then turning the relation between evolution and development on its head bjorklund demonstrates how an understanding of our species evolution can help us better understand current development and how to better rear successful and emotionally healthy children
