## ***The Obama Effect***

2014-05-31

barack obama s historic 2008 campaign exposed many white americans more than ever before to a black individual who defied negative stereotypes while obama s politics divided voters americans uniformly perceived obama as highly successful intelligent and charismatic what effect if any did the innumerable images of obama and his family have on racial attitudes among whites in the obama effect seth k goldman and diana c mutz uncover persuasive evidence that white racial prejudice toward blacks significantly declined during the obama campaign their innovative research rigorously examines how racial attitudes form and whether they can be changed for the better the obama effect draws from a survey of 20 000 people whom the authors interviewed up to five times over the course of a year this panel survey sets the volume apart from most research on racial attitudes from the summer of 2008 through obama s inauguration in 2009 there was a gradual but clear trend toward lower levels of white prejudice against blacks goldman and mutz argue that these changes occurred largely without people s conscious awareness instead as obama became increasingly prominent in the media he emerged as an exemplar that countered negative stereotypes in the minds of white americans unfortunately this change in

attitudes did not last by 2010 racial prejudice among whites had largely returned to pre 2008 levels mutz and goldman argue that news coverage of obama declined substantially after his election allowing other more negative images of african americans to re emerge in the media the obama effect arrives at two key conclusions racial attitudes can change even within relatively short periods of time and how african americans are portrayed in the mass media affects how they change while obama s election did not usher in a post racial america the obama effect provides hopeful evidence that racial attitudes can and for a time did improve during obama s campaign engaging and thorough this volume offers a new understanding of the relationship between the mass media and racial attitudes in america

## The TOMS Effect

2019-10-15

in 2006 the toms shoe company radically disrupted the for profit business model literally for good in challenging what a money making company could do with its earnings toms incorporated a giving component within its business model making giving intrinsic to each sale for every pair of shoes sold another pair would be given away to a child in need giving thus became good business at both levels in making money and in helping kids the toms effect is a book that explains and explores this phenomenon through toms company history as well as through major corporations like walgreens walmart nestle stella artois and michael kors as in addition to younger smaller companies and start ups like warby parker brandless and not impossible labs toms founder blake mycoskie was the epitome of counter culture ceo his goal to start something that matters has been proven in terms of business sense he is worth 300 million and has been sustained through product line evolution and creative marketing where the shoes become a movement and the customer becomes a partner the toms effect has influenced the behavior of consumers as well as young entrepreneurs and established corporations in november 2018 blake took to late night shows to publicize toms newest giving ventures end gun violence together egvt and pick your style pick your stand these campaigns have been riskier than toms previous social justice health and community efforts will this latest iteration of the toms model be sustainable both in terms of monetization of egvt products and in effectively causing change

for many observers the european union is mired in a deep crisis between sluggish growth political turmoil following a decade of austerity politics brexit and the rise of asian influence the eu is seen as a declining power on the world stage columbia law professor anu bradford argues the opposite in her important new book the brussels effect the eu remains an influential superpower that shapes the world in its image by promulgating regulations that shape the international business environment elevating standards worldwide and leading to a notable europeanization of many important aspects of global commerce the eu has managed to shape policy in areas such as data privacy consumer health and safety environmental protection antitrust and online hate speech and in contrast to how superpowers wield their global influence the brussels effect a phrase first coined by bradford in 2012 absolves the eu from playing a direct role in imposing standards as market forces alone are often sufficient as multinational companies voluntarily extend the eu rule to govern their global operations the brussels effect shows how the eu has acquired such power why multinational companies use eu standards as global standards and why the eu s role as the world s regulator is likely to outlive its gradual economic decline extending the eu s influence long into the future

### The Copycat Effect

2004-09-14

violence begets violence begets violence a disturbed student shoots up his classroom and suddenly a wave of mass murder is sweeping through our nation s schools a young child is taken from her home and for months afterward child abductions are frantically reported on an almost daily basis a surfer is attacked by a shark and the public spends an entire summer fearing an onslaught of the deadly underwater predators why do the terrible events we see in the media always seem to lead to more of the same noted author and cultural behaviorist loren coleman explores how the media s over saturated coverage of murders suicides and deadly tragedies makes an impact on our society this is the copycat effect the phenomenon through which violent events spawn violence of the same type from recognizing the emerging patterns of the copycat effect to how we can deal with and counteract its consequences as individuals and as a culture loren coleman has uncovered a tragic flaw of the information age a flaw which must be corrected before the next ripples of violence spread

### The Gender Effect

2018-02-23

how and why are u s transnational corporations investing in the lives educations and futures of poor racialized girls and women in the global south is it a solution to ending poverty or is it a pursuit of economic growth and corporate profit drawing on more than a decade of research in the united states and brazil this book focuses on how the philanthropic social responsibility and business practices of various corporations use a logic of development that positions girls and women as instruments of poverty alleviation and new frontiers for capitalist accumulation using the girl effect the philanthropic brand of nike inc as a central case study the book examines how these corporations seek to address the problems of gendered poverty and inequality yet do so using an instrumental logic that shifts the burden of development onto girls and women without transforming the structural conditions that produce poverty these practices in turn enable corporations to expand their legitimacy authority and reach while sidestepping contradictions in their business practices that often exacerbate conditions of vulnerability for girls and women with a keen eye towards justice author kathryn moeller concludes that these corporatized development practices de politicize girls and women s demands for fair labor practices and a just global economy

efficient auditory processing requires the rapid integration of transient sensory inputs this is exemplified in human speech perception in which long stretches of a complex acoustic signal are typically processed accurately and essentially in real time spoken language thus presents listeners auditory systems with a considerable challenge even when acoustic input is clear however auditory processing ability is frequently compromised due to congenital or acquired hearing loss or altered through background noise or assistive devices such as cochlear implants how does loss of sensory fidelity impact neural processing efficiency and health how does this ultimately influence behavior this research topic explores the neural consequences of hearing loss including basic processing carried out in the auditory periphery computations in subcortical nuclei and primary auditory cortex and higher level cognitive processes such as those involved in human speech perception by pulling together data from a variety of disciplines and perspectives we gain a more complete picture of the acute and chronic consequences of hearing loss for neural functioning

we conducted this film test to evaluate several manufacturers photographic films for their ability to acquire imagery on the international space station we selected 25 motion picture photographic slide and negative films from three different film manufacturers we based their selection on the fact that their films ranked highest in other similar film tests and on their general acceptance by the international community this test differed from previous tests because the entire evaluation process leading up to the final selection was based on information derived after the original flight film was scanned to a digital file previously conducted tests were evaluated based on 8x10s that were produced from the film either directly or through the internegative process this new evaluation procedure accurate quantitative data on granularity and contrast from the digital data

this report is the committee s second inquiry in the effect of the economic downturn on the people of the region the committee s terms of reference are what problems exist and how their effect can be minimised in advance of an economic upturn how effectively government agencies and other regional bodies are addressing these problems and what advice and assistance people need to help them live more sustainable lifestyles in the future the committee was particularly interested in the level of indebtedness and home repossessions availability of appropriate training the adequacy of assistance and social cohesion the committee is concerned that some of those areas most in need of additional government assistance may not be aware of new funding available and do not have the capacity to bid for it they understand that the taskforce should not be seen as the answer to every problem in the region and that it was set up to focus on the initial economic impact of the downturn however the taskforce has reach within the region and uninhibited connection to whitehall it is also recognised that the region s third sector has not been as fully engaged as they had hoped
