The Blue Terraplane 2014-06-03 you must be very intelligent is the author s account of studying for a phd in a modern successful university part memoir and part exposé this book is highly entertaining and unusually revealing about the dubious morality and desperate behaviour which underpins competition in twenty first century academia this witty warts and all account of bodewits years as a phd student in the august university of edinburgh is full of success and failure passion and pathos insight farce and warm hearted disillusionment she describes a world of collaboration and backstabbing nefarious financing and wasted genius cosmopolitan dreamers and discoveries that might just change the world is this a smart people s world or a drip can of weird species modern academia is certainly darker and stranger than one might suspect this book will put a wry knowing smile on the faces of former researchers and it is a cautionary parable for innocents who still believe that lofty academia is erected upon moral high ground

*You Must Be Very Intelligent* 2017-07-03 that english has no diminutives is a common myth the present study shows however that english does possess diminutives and not only analytic but also synthetic diminutive markers analytic markers include first and foremost little as well as other adjectives from the same word field whereas the inventory of synthetic markers comprises suffixes as for instance ie ette let kin een s er poo and pegs these markers are examined from a grammatical and a pragmatic perspective in an integrative formal functional framework the grammatical perspective involves phonological morphological and semantic features while the pragmatic perspective involves pragmalinguistic as well as sociopragmatic features on the levels of the speech act and larger interactive units in dialogue the findings reveal that english diminutive suffixes are in fact among the most productive suffixes of the english language while the suffixes share a number of features each has developed its own profile specifically regarding semantic and pragmatic features in everyday conversation there is a division of labour between the synthetic and the analytic type of formation concerning the communicative functions of diminutives and their distribution in discourse the choice of formal device and its function depend crucially on pragmatic factors notably on the illocution the interactive status the realisation strategy and the politeness value of the utterances in which diminutives are employed and also on the relationship between the interlocutors
