2004

this volume is a comprehensive collection of critical essays on the taming of the shrew and includes extensive discussions of the play s various printed versions and its theatrical productions aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play the issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality

Lloyd's Register of British and Foreign Shipping

1843

the encyclopedia of library and information science provides an outstanding resource in 33 published volumes with 2 helpful indexes this thorough reference set written by 1300 eminent international experts offers librarians information computer scientists bibliographers documentalists systems analysts and students convenient access to the techniques and tools of both library and information science impeccably researched cross referenced alphabetized by subject and generously illustrated the encyclopedia of library and information science integrates the essential theoretical and practical information accumulating in this rapidly growing field

Southern Florist and Nurseryman

1981

this is the first book to focus on the problem of ensuring the correctness of floating point hardware designs through mathematical methods formal verification of floating point hardware design advances a verification methodology based on a unified theory of register transfer logic and floating point arithmetic that has been developed and applied to the formal verification of commercial floating point units over the course of more than two decades during which the author was employed by several major microprocessor design companies the book consists of five parts the first two of which present a rigorous exposition of the general theory based on the first principles of arithmetic part i covers bit vectors and the bit manipulation primitives integer and fixed point encodings and bit wise logical operations part ii addresses the properties of floating point numbers the formats in which they are encoded as bit vectors and the various modes of floating point rounding in part iii the theory is extended to the analysis of several algorithms and optimization techniques that are commonly used in commercial implementations of elementary arithmetic operations as a basis for the formal verification of such implementations part iv contains high level specifications of correctness of the basic arithmetic instructions of several major industry standard floating point architectures including all details pertaining to the handling of exceptional conditions part v illustrates the methodology applying the preceding theory to the comprehensive verification of a state of the art commercial floating point unit all of these results have been formalized in the logic of the acl2 theorem prover and mechanically checked to ensure their correctness they are presented here however in simple conventional mathematical notation the book presupposes no familiarity with acl2 logic design or any mathematics beyond basic high school algebra it will be of interest to verification engineers as well as arithmetic circuit designers who appreciate the value of a rigorous approach to their art and is suitable as a graduate text in computer arithmetic

The Law and Practice of the Supreme Court of Judicature, Comprising the Supreme Court of Judicature Act, 1873

1874

this textbook provides an accessible introduction to the fundamentals of geometric and physical optics as they relate to practical problems encountered by engineers and researchers in designing and analyzing optical systems in this updated edition the author focuses on topics that are critical to understanding how the basic principles of optics affect design decisions in addition to information on breadboarding experiments and prototypes the new edition also expands its coverage of diffraction and includes numerous complete examples and practical reminders professor charles a dimarzio is an associate professor in the department of electrical and computer engineering the department of mechanical and industrial engineering and the department of bioengineering at northeastern university in boston massachusetts he spent 14 years at raytheon company s electro optics systems laboratory in coherent laser radar for air safety and meteorology among other projects there he worked on an airborne laser radar flown on the galileo ii to monitor airflow related to severe storms pollution and wind energy and another laser radar to characterize the wake vortices of landing aircraft his current research in biomedical optics focuses on microscopy including coherent imaging structured illumination and multi modal imaging he is also a founding member of gordon censis the gordon center for subsurface sensing and imaging systems

this book provides descriptions and illustrations of cutting edge text analysis methods for communication and marketing research cultural historical comparative and event analysis curriculum evaluation psychological diagnosis language development research and for any research in which statistical inferences are drawn from samples of texts although the book is accessible to readers having no experience with content analysis the text analysis expert will find substantial new material in its pages in particular this collection describes developments in semantic and network text analysis methodologies that heretofore have been accessible only among a smattering of methodology journals the book s international and cross disciplinary content illustrates the breadth of quantitative text analysis applications these applications demonstrate the methods utility for international research as well as for practitioners from the fields of sociology political science journalism communication computer science marketing education and english this is an ecumenical collection that contains applications not only of the most recent semantic and network text analysis methods but also of the more traditional thematic method of text analysis in fact it is originally with this volume that these two relational approaches to text analysis are defined and contrasted with more traditional thematic text analysis methods the emphasis here is on application the book s chapters provide guidance regarding the sorts of inferences that each method affords and up to date descriptions of the human and technological resources required to apply the methods its purpose is as a resource for making quantitative text analysis methods more accessible to social science researchers

Index to the Reports and Documents of the 54th Congress,

1st Session-72d Congress, 2d Session, Dec. 2, 1895-- March 4, 1933 with Numerical Lists and Schedule of Volumes

1897

specialist periodical reports provide systematic and detailed review coverage of progress in the major areas of chemical research written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry for over 80 years the royal society of chemistry and its predecessor the chemical society have been publishing reports charting developments in chemistry which originally took the form of annual reports however by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series specialist periodical reports was born the annual reports themselves still existed but were divided into two and subsequently three volumes covering inorganic organic and physical chemistry for more general coverage of the highlights in chemistry they remain a must since that time the spr series has altered according to the fluctuating degree of activity in various fields of chemistry some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued the current list of specialist periodical reports can be seen on the inside flap of this volume

NASA Technical Memorandum

1991

explores the place of science and technology in international relations through early attempts at international governance of aviation and atomic energy

Manual of Military Law

1894

finalist for the pulitzer prize biography a new york times bestseller this epic and elegant biography wall street journal profoundly recasts our understanding of the vietnam war praised as a superb scholarly achievement foreign policy the road not taken confirms max boot s role as a master chronicler washington times of american military affairs through dozens of interviews and never before seen documents boot rescues edward lansdale 1908 1987 from historical ignominy to restore a sense of proportion to this political svengali or lawrence of asia the new yorker boot demonstrates how lansdale the man said to be the fictional model for graham greene s the quiet american pioneered a hearts and minds diplomacy first in the philippines and then in vietnam bringing a tragic complexity to lansdale and a nuanced analysis to his visionary foreign policy boot suggests vietnam could have been different had we only listened with contemporary reverberations in iraq afghanistan and syria the road not taken is a judicious and absorbing new york times book review biography of lasting historical consequence
