Essential Skills for Agile Development

2004-06-01

agile development in particular extreme programming xp has been gaining a lot of momentum because it can effectively address the problems plaguing software development in 2002 we the macau productivity and technology center cpttm started to hold courses on xp and oo design to teach the skills in agile development at the beginning we hired a well known software training and consulting company to teach while the instructor was very professional and instructive and the feedbacks from the students were very good the students didn t acquire the skills taught we knew that it was because the concepts involved were abstract and it needed far more exercises for the students to practice in order to acquire the skills therefore we decided to develop our enhanced training materials in particular we selected only 20 of the skills in agile development that deliver 80 of the value while ignoring those useful but non essential skills then we explained these skills in terms of examples and added a lot of real world examples as exercises after adopting this set of materials the new students really acquired the skills taught now we have organized the training materials into a book essential skills for agile development this book covers the essential skills in oo design test driven development tdd team development planning communication and pair programming
