2019

The Chinese Transformation of Corporate Culture 2012 in recent years chinese policymakers and corporate leaders have focused enormous attention on the concept of corporate culture despite its widespread influence among chinese corporate leaders and policymakers the corporate culture phenomenon has not been studied in detail by non chinese scholars this book will reveal the political social and economic factors behind the enormous current interest in corporate culture in china and provide a wide range of case studies that focus on how large corporations like haier huawei and mengniu have attempted to transform their cultures and how they represent themselves as complying with the chinese government s interpretation of positive corporate culture howes demonstrates how the foreign concept of corporate culture has been re defined in china to fit the chinese political social and cultural context he examines how this re definition of corporate culture reflects a uniquely chinese conception of the purposes and social functions of the capitalist business corporation and how the chinese communist party s active promotion of socialist corporate culture evidences a shift in the party s identity towards a business friendly champion of corporate and economic development this work will be of great interest to students and scholars of asian studies business and management and chinese studies

2021-10-09 The advancement of technology such as data analytics and ai has led to the birth of industry 4.0 in which technology seems to be at the centre of development however as the covid 19 pandemic created havoc the entire world production chain was seriously affected highlighting that machines alone although fully connected and automated cannot function without people this book addresses contemporary issues and the impact of digital transformation on individuals businesses and governments in asia as asian nations are moving fast towards the digital economy this edited collection offers new perspectives on understanding emerging business opportunities as well as the challenges faced chapters explore the variables that accelerate digital transformation notably the covid 19 pandemic the rapid development of information and communication technology ai big data and affordable internet access and their impact on business and society with rich empirical studies from leading researchers this book will be a reference for academics and scholars across business disciplines including information technology and innovation management organisational and strategic management as well as those interested in industrial development

2000-07 this part of gb t 11024 specifies the requirements for power capacitor testing and provides guidelines for fuse protection this part applies to internal fuses referred to as fuses that disconnect the faulty capacitor component so as to allow the remainder of the capacitor unit and the capacitor bank to which the capacitor unit is connected to continue to operate such fuses are not intended as replacements for switching devices such as circuit breakers or as replacements for external protection of capacitor banks or any portion thereof

Digital Transformation for Business and Society 2023-10-06 this standard specifies the firewall in terms of security technical requirements test evaluation methods and security grade division

GB/T 11024.4-2019 Translated English of Chinese Standard. (GBT 11024.4-2019, GB/T11024.4-2019, GBT11024.4-2019) 2019-11-02 this standard specifies the charpy pendulum impact test method for measuring the energy absorbed by impact specimens v shaped u shaped notch unnotched specimens in the impact test of metallic materials this standard applies to the charpy pendulum impact test under room temperature high temperature or low temperature conditions but does not include the instrumental impact test method the content of this part is as shown in gb t 19748

GB/T 20281-2015 Translated English of Chinese Standard. (GBT 20281-2015, GB/T20281-2015, GBT20281-2015) 2015-10-22 with the end of dennard scaling and moore s law ic chips especially large scale ones now face more reliability challenges and reliability has become one of the mainstay merits of vlsi designs in this context this book presents a built in on chip fault tolerant computing paradigm that

seeks to combine fault detection fault diagnosis and error recovery in large scale vlsi design in a unified manner so as to minimize resource overhead and performance penalties following this computing paradigm we propose a holistic solution based on three key components self test self diagnosis and self repair or 3s for short we then explore the use of 3s for general ic designs general purpose processors network on chip noc and deep learning accelerators and present prototypes to demonstrate how 3s responds to in field silicon degradation and recovery under various runtime faults caused by aging process variations or radical particles moreover we demonstrate that 3s not only offers a powerful backbone for various on chip fault tolerant designs and implementations but also has farther reaching implications such as maintaining graceful performance degradation mitigating the impact of verification blind spots and improving chip yield this book is the outcome of extensive fault tolerant computing research pursued at the state key lab of processors institute of computing technology chinese academy of sciences over the past decade the proposed built in on chip fault tolerant computing paradigm has been verified in a broad range of scenarios from small processors in satellite computers to large processors in hpcs hopefully it will provide an alternative yet effective solution to the growing reliability challenges for large scale vlsi designs

GB/T 229-2020 Translated English of Chinese Standard. (GBT 229-2020, GB/T229-2020, GBT229-2020) 2021-01-10 this document specifies the interoperability requirements and testing of the vehicle side of electric vehicle wireless power transfer system including system architecture classification technical requirements test preparation interoperability testing and onboard reference device etc this document is applicable to electric vehicle static magnetic coupling wireless power transfer system whose maximum rated voltage of the power supply is 1 000 v ac or 1 500 v dc and the maximum rated output voltage is 500 v dc other rated output voltages may take this as a reference in implementation

Built-in Fault-Tolerant Computing Paradigm for Resilient Large-Scale Chip Design 2023-03-01                                                                

GB/T 38775.7-2021 Translated English of Chinese Standard. (GBT38775.7-2021) 2022-01-06                                                                  

CharadeManiacs                                                                                    

GB/T 11024.2-2019 Translated English of Chinese Standard. (GBT 11024.2-2019, GB/T11024.2-2019, GBT11024.2-2019) 2019-11-02

GB/T 41607-2022 Translated English of Chinese Standard (GB/T 41607-2022, GBT41607-2022) 2022-09-20 this document specifies the requirements and test methods for cybersecurity of remote service and management system for electric vehicles this document applies to data communication between the on board terminals of battery electric vehicles plug in hybrid electric vehicles and fuel cell electric vehicles vehicle enterprise service and management platforms and public service and management platforms

~~GB/T 41607-2022 Translated English of Chinese Standard (GB/T 41607-2022, GBT41607-2022)~~ 2022-09-20 this standard specifies the terms and definitions classification performance grades and markings raw materials and mixing ratios quality requirements preparation test methods inspection rules ordering and delivery of ready mixed concrete this standard is applicable to ready mixed concrete produced in mixing plants towers this standard does not include the pouring vibrating and curing of concrete after delivery

Understanding Startups From Idea to Market 2022-04-08 this standard specifies the technical requirements and test methods for the cybersecurity of hardware communication protocols and interfaces operating systems application software and data of on board information interactive system this standard is applicable to the guidance of original equipment manufacturers component suppliers and software suppliers in the implementation of the design development verification and production for the information security technology of onboard information interactive system

GB/T 40855-2021 Translated English of Chinese Standard (GB/T40855-2021) 2021-11-05 this document gives the sound quality limit requirements and test methods for refrigerator noise this document applies to household refrigerators this document does not apply to commercial refrigerators

GB/T 14902-2012 Translated English of Chinese Standard. (GBT 14902-2012, GB/T14902-2012, GBT14902-2012) 2021-05-02 this standard specifies the technical requirements and test methods of dc dc converter for electric vehicles this standard is applicable to dc dc converter for electric vehicles other circuits with dc dc conversion function may take this document as a reference

GB/T 40856-2021 Translated English of Chinese Standard (GB/T40856-2021) 2021-11-05 this standard specifies the general requirements functional requirements environmental adaptability requirements test procedures for advanced emergency braking systems of commercial vehicles the standard applies to advanced emergency braking systems installed on commercial vehicles where the test procedures are applicable to the normative testing of advanced emergency braking systems in a closed field test environment

GB/T 42395.1-2023 Translated English of Chinese Standard (GB/T 42395.1-2023, GBT42395.1-2023) 2023-08-22
