doing so book jacket title summary field provided by blackwell north

america inc all rights reserved archaeological heritage conservation is

all too often highly conflicted economic interests are often at the

forefront of management decision making with heritage values given

lesser if any consideration but when heritage places are managed with

international principles in mind the sites stand out as evidencing

superior outcomes clearly laid out and fully illustrated this

comprehensive introductory level book on the subject is perfect as a

practical reference book for professional and students and an

introduction for those training as archaeological conservators this

publication commemorates the 50th anniversary of the conservation

laboratory of the university of pennsylvania museum which is now part

of the new center for the analysis of archaeological materials these

papers were presented at an international symposium to celebrate the

collaboration of conservators with allied professionals archaeological

sites around the world are threatened by forces including population

growth development urbanization pollution tourism vandalism and

looting site management planning is emerging as a critical element not

only for the conservation of this heritage but also to address issues such

as tourism and sustainable development this book reports on the

proceedings of a workshop held in greece where an international group

of professionals gathered to discuss challenges faced by archaeological

sites in the mediterranean and to examine management planning

methods that might generate effective conservation strategies in 1991

the mosque at ayodhya in india was demolished by hindu

fundamentalists who claim that it stood on the birthplace of a legendary

hindu hero during recent conflicts in former yugoslavia ethnic groups

destroyed mosques and churches to eliminate evidence of long term

settlement by other communities over successive centuries however a

single building in cordoba functioned as a mosque a church and a

synagogue the roman emperor diocletian s palace in split is occupied

today by shops and residential apartments what circumstances have

lead to the survival and reinterpretation of some monuments but the

destruction of others this work asks whether the idea of world heritage

is an essential mechanism for the protection of the world s cultural and

natural heritage or whether it subjugates a diversity of cultural

traditions to specifically western ideas how far is it acceptable for one

group of people to comment upon or intercede in the way in which

The Archaeologist's Manual for Conservation

2007-05-08

this is a foreword by an archaeologist not a conservator but as brad
rodgers says conservation has been steadily pulled from archaeology by
the forces of specialization p 3
and hewantstoremedy that situation through this manual he
sees this work as a call to action for the non professional conservator
permitting curators conservators and archaeologists to identify artifacts
that need professional attention and allow these professionals to stabilize
most artifacts in their own laboratories with minimal intervention using
simple non toxic procedures p 5 it is the mission of brad s manual to
bring conservation back into arch ology p 6 the degree of success of that
goal depends on the degree to which archaeologists pay attention to and
put to use what brad has to say because as he says the conservationist
archaeologist is responsible to make preparation for an artifact s care
even before it is excavated and after its storage into the foreseeable
future a tremendous responsibility p 10 the manual is a combination of
highly technical as well as common sense methods of conserving wood
iron and other metals ceramics glass and stone organics and composites
a far better guide to artifact conservation than was available to me when i
faced that archaeological challenge at colonial brunswick town north
carolina in 1958 a challenge still being faced by archaeologists today the
stage of conservation in 1958 is in dramatic contrast to the procedures
brad describes in this manual conservation has indeed made great
progress for instance
a common procedure then was to heat the artifacts red hot in a furnace a
method that made me cringe

The Conservation of Archaeological Materials

2010

annotation over the years archaeologists have developed a number of
techniques for conserving historical artifacts for future generations
along with these techniques researchers have developed a series of
ethical principles for treating materials in a way that allows them to be
not only observed and analyzed for the present but also re studied in the
future conservation techniques used up to now however have provided
artifacts only a limited lifespan and in some cases they do not work well
with waterlogged materials within the past few years archaeological
chemistry and concerns of longevity testing have become central issues
in the development of conservation treatment strategies working with
dow corning corporation texas a m s archaeological preservation
research lab aprl and the conservation research lab crl smith and his
colleagues in as m s nautical archaeology program set out to develop a
series of chemistries and techniques that would provide successful and
affordable treatment strategies for organic materials in this ground
breaking description of the processes and materials that were developed
smith explains these techniques in ways that will allow museums and
historical societies to conserve more stable artifacts for traveling
exhibits and interactive displays and will allow researchers to conserve
new discoveries without sacrificing important information beyond the
advantages offered by polymer replacement passivation polymer
technologies smith considers a concept seldom addressed in
conservation artistry variance in equipment relative humidity laboratory
layout intended results and level of expertise all affect researchers
ability to obtain consistent and aesthetically correct samples and require
a willingness to explore treatment parameters and combinations of
polymers smith prescribes an effective layout for data

~~understanding of what conservation involves and of how it can~~ **pokemon**
contribute to the study and enjoyment of the heritage issues affecting conservation and its future development are examined and illustrated with examples the principal focus of the book is on conservation of archaeological ethnographic and museum objects with reference to and comparison with conservation in other fields such as buildings and monuments and fine and decorative arts topics include the context and scope of conservation and its ethical and theoretical basis history of conservation meaning of objects and its effect on conservation change and deterioration in materials and objects issues in practice decision making conservation procedures working relations between conservators curators and scientists development of a conservation profession training in conservation communicating conservation and attracting public support caring for the past will be of value to those wishing to explore ideas about conservation of archaeological and museum objects including heritage or collections managers archaeologists museum curators conservators and materials scientists it will be particularly useful as a text for postgraduate courses in conservation museum studies and cultural heritage management

Management Planning for Archaeological Sites

2002

while much has been achieved in understanding and managing weather effects and erosion phenomena affecting ancient imagery within the relatively protected environments of caves and rock shelters the same cannot be said of rock art panels situated in the open air despite the fact that the number of known sites has risen dramatically in recent decades there are few examples in which the weathering and erosion dynamics are under investigation with a view to developing proposals to mitigate the impact of natural and cultural processes most of the work being done in different parts of the world appears to be ad hoc with minimal communication on such matters between teams and with the wider archaeological community this richly illustrated book evaluates rock art conservation in an holistic way bringing together

Conservation in Archaeology and the Applied Arts

1975

is research in stone conservation on the rocks this volume part of the gci s research in conservation series offers an in depth critical appraisal of the status of stone conservation research today identifying areas of strength and weakness in the field as a whole c a price a noted british archaeological conservation scientist discusses recent research on the causes of stone decay as well as current preventive measures assessment tools and treatment durability he also reviews current research on methods of evaluating the effectiveness of these methodologies and treatments the book includes a comprehensive survey of the literature draws from conversations with professionals in the field and provides recommendations for increasing the effectiveness of research including the improvement of training symposia and research programs and the establishment of conservation policy

Caring for the Past

2001

this book undertakes a comparative study of the history and development of legislative and administrative systems in operation today for the protection of archaeological monuments with the exception of scandinavia and the united kingdom no country adopted a positive policy towards the protection and conservation of its archaeological and historical heritage until the twentieth century moreover it was not until the middle of that century under the threat of wholesale devastation from extensive schemes for social and economic development that the accelerating disappearance of the sites and monuments of antiquity became the object of intensive study and legislation since then systems of cultural resource management have developed throughout the world a range of countries from europe america asia and africa representing a diversity of political and ideological systems capitalist socialist and ex colonial have been selected as being broadly representative of the
