african theology involves theology that reflects the original thinking of african people many african have expressed a need for the theology that reflects the original thinking of african peoples some theologians have recklessly labeled every aspect of african culture to be evil whereas others have expressed contempt regarding christianity wrapped in europeans culture having stayed away from my culture for more than twenty years i have encountered several cultural shocks my personal experience has induced me to invest time

into intensive researching on the issue of culture and christianity in anticipation to help somebody puzzled and drowned in confusion i mean somebody who will not draw a diving line between the two aspects of lives within every cultural background setting there is a godly culture that is not in conflict with christianity the culture of man apart from god equals to corruption god created culture and he sent his son to restore and to preserve the moral values of the cultures the godly culture of man should therefore not be in conflict with the culture of the bible this topic has been produced in a series of teachings in different volumes of books for deeper clarification i advise you to read all of the series available for your spiritual growth pastor stephen kyeyune

cultural competence in sports medicine provides comprehensive information regarding the cultural attitudes beliefs and expectations that health care professionals may encounter in working with athletes and how to modify their professional behavior accordingly

Cosmic Order and Cultural Astronomy

2009-10-02

health is a contested concept that has been defined in numerous ways the media is extremely powerful in promoting health beliefs and in creating role models for contemporary people the ways in which health is defined or understood can have wide ranging implications and can have an impact on issues such as health promotion or health literacy health

presentation in the media has a significant social impact because this type of message is important in changing people's beliefs, attitudes, and behaviours relating to health and in promoting health-related knowledge among the target audience. The present volume provides an interdisciplinary and multicultural contemporary approach to the controversial link between medicine and media. The authors that have contributed to this volume analyse the media and medicine from different perspectives and different countries: USA, UK, Portugal, Turkey, Taiwan, Mexico, Estonia, Romania, thus offering a re-positioning of the study of media and medicine. The new perspectives offered by this volume will be of interest to any health communication or media studies student or academic since they bring to light new ideas, new methodologies, and new results.

Shaping the Society: Christianity and Culture

2012-05-03

examines the history of evolutionism in cultural anthropology, beginning with its roots in the 19th century through the half-century of anti-evolutionism to its reemergence in the 1950s and the current perspectives on it today. No other book covers the subject so fully or over such a long period of time. Evolutionism and cultural anthropology traces the interaction of evolutionary thought and anthropological theory from Herbert Spencer to the twenty-first century. It is a focused examination of how the idea of evolution has continued to provide anthropology with a master principle around which a vast body of data can be organized and synthesized. Erudite and readable, and quoting extensively from early theorists such as Edward Tylor, Lewis Henry Morgan, John McLennan, Henry Maine, and James Frazer, so that the reader might judge them on the basis of their own words. Evolutionism and cultural anthropology is useful reading for courses in anthropological theory and the history of anthropology. 0813337666 Evolutionism in Cultural Anthropology: A Critical History

Cultural and Tourism Innovation in the Digital Era

2020-02-13

rich case studies examining responses to climatic events in ancient Europe and the Near East. The subject of climate change could hardly be more timely. In climate and cultural change in prehistoric Europe and the Near East, an interdisciplinary group of contributors examine climate change through the lens of new archaeological and paleo-environmental data over the course of more than 10,000 years from the Near East to Europe. Key climatic and other events are contextualized with cultural changes and transitions for which the authors discuss when, how, and if changes in climate and environment caused people to adapt, move, or perish. More than this publication of crucial archaeological and paleo-environmental data, however, the volume seeks to understand the social, political, and economic significance of climate change as it was manifested in various ways around the Old World. Contrary to perceptions of threatening global warming in our popular media and in contrast to grim images of collapse presented in some archaeological discussions of past climate change, this book rejects outright societal collapse as a likely outcome. Yet this does not keep the authors from considering climate change as a potential factor in explaining culture change by adopting a critical stance with regard to the long-standing practice of equating synchronicity with causality and explicitly considering alternative explanations.
