this book discusses in detail how orthodox christianity was involved in and influenced political transition in ukraine serbia and georgia after the collapse of communism based on original research including extensive interviews with clergy and parishioners as well as historical legal and policy analysis the book argues that the nature of the involvement of churches in post communist politics depended on whether the interests of the church for example in education the legal system or economic activity were accommodated or threatened if accommodated churches confined themselves to the sacred domain if threatened they engaged in daily politics if churches competed with each other for organizational interests they evoked the support of nationalism while remaining within the religious domain

a definitive global survey of the interaction of ethnicity nationalism and politics this handbook blends rigorous theoretically grounded analysis with empirically rich illustrations to provide a state of the art overview of the contemporary debates on one of the most pervasive international security challenges today fully updated for the second edition the book includes a new section which offers detailed analyses of contemporary cases of conflict such as in ukraine kosovo the african great lakes region and in the kurkish areas across the middle east thus providing accessible examples that bridge the gap between theory and practice the contributors offer a 360 degree perspective on ethnic conflict from the theoretical foundations of nationalism and ethnicity to the causes and consequences of ethnic conflict and to the various strategies adopted in response to it without privileging any specific explanation of why ethnic conflict happens at a particular place and time or why attempts at preventing or settling it might fail or succeed the routledge handbook of ethnic conflict enables readers to gain a better insight into such defining moments in post cold war international history as the disintegration of the soviet union and yugoslavia and their respective consequences the genocide in rwanda and the relative success of conflict settlement efforts in northern ireland by contributing to understanding the varied and multiple causes of ethnic conflicts and to learning from the successes and failures of their prevention and settlement the handbook makes a powerful case that ethnic conflicts are neither unavoidable nor unresolvable but rather that they require careful analysis and thoughtful and measured responses
