that that prejudice should cling to the actor i believe and of course i know there are many who agree that the art of the actor is quite as dignified quite as creative and perhaps even more vital and potent than any other of the fine arts but by many we are considered disciples of a minor art because it is pointed out that we must depend upon the dramatic author for our material that we merely imitate or reproduce his conceptions anyone who knows the real story of a play s precarious journey to public favor knows how often that process is reversed knows how often the playwright relies on the art of the actor to endow his characters with life knows how often a play in the hands of the actors grows far beyond the conception of the author in my own case i have often been compelled to extinct as literature and our stage is in a deplorable condition of decline no one ventures to dispute but there are two opinions as to whether a revival is possible or even probable and various opinions as to the avenues through which such a revival may be approached there are three obvious facts which may be urged against the suggestions of hope these are the gradual cessation of all attempts at serious dramatic literature and their replacement by translations from the french or adaptations from novels the slow extinction of provincial theatres which formed a school for the rearing of actors and finally the accident of genius on our stage being unhappily rarer than ever in the face of these undeniable facts the hopeful are entitled to advance facts of equal importance on their side never in the history of our stage were such magnificent rewards within the easy grasp of talent never were there such multitudes to welcome good acting only let the dramatist or the actor appear and not london alone but all england not england alone but all europe will soon resound with his name dramatic literature may be extinct but the dramatic instinct is ineradicable the stage may be in a deplorable condition at present but the delight in mimic representation is primal and indestructible thus it is that in spite of people on all sides declaring that they have ceased to go to the theatre no sooner does an actor arise who is at all above the line no sooner does a piece appear that has any special source of attraction than the public flock to the theatre as it never flocked man or woman who does not love the work is pretty sure to make nothing of it and to retire in disappointment sooner or later or else to continue in a half hearted sort of way that leads to nothing of course it is a hard life miss clara morris who has seen some thirty years of it said once what attraction has the stage for its followers that they are so devoted to it yes we are devoted to it we respect its antiquity we admire the position it has gained in the world of art we are grateful to it for our daily bread one of its attractions is that it may prove a short cut to popularity then people of other callings transact their business amid more talked concerning the essential qualificaor less dull surroundings and return to their homes for that which the actor finds at the theatre alone namely light warmth music sociability for my part i do not believe in a mute inglorious milton i think that all power demands expression and the employment of power is a delight the actor who succeeds feels he pleases his public and therein finds his own pleasure when triumph comes to him it is in so delightful a guise he cannot help being moved by it when an author places his book before the public he must wait he learns gradually of his success not so the actor his work receives instant recognition in swift soul satisfying applause and what a delicious draught it is it produces a sort of divine intoxication that having once experienced one longs to repeat upon the other hand there are shadows about the career of the stage which some actors find so deep as to excerpt from the actor and his art for some time past much attention has been devoted to the members of our profession the actor and the theatre have been discussed again and again an attempt has been made to prove that we are a race of beings set apart from the rest of the world whether viewed from a social or an artistic point some have even gone so far as to call us mere parrots i shall now try to prove that the actor is an artist and has the same title to a place in the state as any other citizen in the first place what is art and what do we understand by it if not the interpretation of nature and of truth more or less tinged by a peculiar light which does not alter the proportions but yet marks the salient features heightens their colors displays their fidelity to nature so that our minds arc more deeply and forcibly affected by them is it not the actor s duty to cast this light about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at theory which identifies the actor rather than the director as the key creative force in the performance of Shakespeare because actors are absent from the site of Shakespearean meaning he argues the illusion of their centrality is sustained only by a rhetoric of heroism violence and imperialism the actor at work presents experiential exercises designed to help students develop a complete understanding of the physical vocal analytical and ethical aspects of acting for more than thirty years Robert Benedetti's highly acclaimed *The Actor at Work* has offered students a thorough focus on the underlying principles of the acting process the central importance of the actor author is a distinctive feature of Italian theatrical life in all its eclectic range of regional cultures and artistic traditions the fascination of the figure is that he or she stands on both sides of one of theatre's most important power relationships between the exhilarating freedom of performance and the austere restriction of authorship and the written text this broad ranging volume brings together critical essays on the role of the actor author spanning the period from the Renaissance to the present starting with Castiglione's *The Courtier*

i have been on the stage for more than forty years my profession and its problems have been the principal interest in my life it is natural that such an extended association with the theater should yield certain technical theories on my art and since i am nearing sixty it is natural that i should want to talk about them i do not regard any opinion i hold on the subject of acting as infallible i learn something new about my profession every day but there is one claim i make for the opinions i state in this book they are not hasty they have been two score years in taking shape i have watched many young people start their careers on the stage i have seen some of them rise to success and others sink to oblivion it has seemed to me that the difficulties each met and the mistakes each was likely to make were in a general way always of the same character they were the difficulties and mistakes which all actors encounter there is no lack of books dealing with the lives of those in the actor s profession but few of them shed any light on the technique by which the admired actors of the past rose to high place they are mostly pleasant chatty reminiscences of their personal lives whereas it is their professional lives that

are significant however in this little study i have not attempted an autobiographical account of my early struggles in the profession nor a story of my experiences on the stage i have rather tried to derive from my experiences some truths which might be of service to the beginning actor to state as concretely as possible some of the simple principles which bitter experience has made me believe are sound louis calvert
