a washington post bestseller three principles for managing and avoiding the problems of growth why is profitable growth so hard to achieve and sustain most executives manage their companies

as if the solution to that problem lies in the external environment find an attractive market formulate the right strategy win new customers but when bain company s chris zook and james allen authors of the bestselling profit from the core researched this question they found that when companies fail to achieve their growth targets 90 percent of the time the root causes are internal not external increasing distance from the front lines loss of accountability proliferating processes and bureaucracy to name only a few what s more companies experience a set of predictable internal crises at predictable stages as they grow even for healthy companies these crises if not managed properly stifle the ability to grow further and can actively lead to decline the key insight from zook and allen s research is that managing these choke points requires a founder s mentality behaviors typically embodied by a bold ambitious founder to restore speed focus and connection to customers an insurgent s clear mission and purpose an unambiguous owner mindset a relentless obsession with the front line based on the authors decade long study of companies in more than forty countries the founder s mentality demonstrates the strong relationship between these three traits in companies of all kinds not just start ups and their ability to sustain performance through rich analysis and inspiring examples this book shows how any leader not only a founder can instill and leverage a founder s mentality throughout their organization and find lasting profitable growth
