2016

this volume provides historical material aesthetic and philosophical explorations of plant based and in vitro food products including multi disciplinary approaches from industry academia and food advocates

Once Upon a Time We Ate Animals

2021-12-28

combining the ethical clarity of jonathan safran foer s eating animals with the disquieting vision of alan weissman s bestseller the world without us a thought provoking entertaining exploration of a future where animal consumption is a thing of the past though increasing numbers of people know that eating meat is detrimental to our planet s health many still can t be convinced to give up eating meat but how can we change behavior when common arguments and information aren t working acclaimed anthropologist roanne van voorst changes the dialogue in once upon a time we ate animals she shifts the focus from the present looking forward to the future looking back imagining a world in which most no longer use animals for food clothing or other items by shifting the viewpoint she offers a clear and compelling vision of what it means to live in a world without meat a massive shift is already taking place everything van voorst covers in this book has already been invented and is being used today by individuals and small organizations worldwide hopeful and persuasive once upon a time we ate animals offers a tantalizing vision of what is not only possible but perhaps inevitable

On Animals

2018-12-27

this book presents an authoritative and comprehensive survey of human practice in relation to other animals together with a christian ethical analysis building on the theological account of animals which david clough developed in on animals volume i systematic theology 2012 it argues that a christian understanding of other animals has radical implications for their treatment by humans with the human use and abuse of non human animals for food the most urgent immediate priority following an introduction examining the task of theological ethics in relation to non human animals and the way it relates to other accounts of animal ethics this book surveys and assess the use humans make of other animals for food for clothing for labour as research subjects for sport and entertainment as pets or companions and human impacts on wild animals the result is both a state of the art account of what humans are doing to other animals and a persuasive argument that christians in particular have strong faith based reasons to acknowledge the significance of the issues raised and change their practice in response

The Future of Meat Without Animals

2016-08-16

this volume provides historical material aesthetic and philosophical explorations of plant based and in vitro food products including multi disciplinary approaches from industry academia and food advocates

Without Animals Life Is Not Worth Living

2016-02-15

in without animals life is not worth living eco philosopher freya mathews livens up her theme that the company of animals is indispensable to human existence by way of the story of an anarchic but irresistible pig in this captivating story of a pig and a philosopher freya takes up the narrational mode of exposition that has recently engaged philosophers her account of pookie tells of a human person's love across a huge species boundary few pigs have been so fondly and respectfully brought into print freya's philosophical commitment to truth leads her into unfashionable conclusions pigs are not particularly intelligent she tells us on the basis of life with pookie she finds pigs to be determined focussed and insistent but not demonstrably smart having made that point freya goes on to provide a vivid account of pookie's actual sentience her sense of self her joy her determination her later dejection and her capacity for remembrance deborah bird rose

Animals, Political Liberalism and Public Reason

2020-07-17

this book explores the problem of disagreement concerning the treatment of animals in a liberal society current laws include an unprecedented concern for animal welfare yet disagreement remains pervasive this issue has so far been neglected both in political philosophy and animal ethics although starting from disagreement has been the hallmark of many politically liberal theories none have been devoted to the treatment of animals and conversely most theories in animal ethics do not take the disagreement on this issue seriously bridging this divide with a change of perspective zuolo argues that we should begin from the disagreement on the moral status of animals and the treatment we owe them reconstructing the epistemic nature of disagreement about animals zuolo proposes a novel form of public justification to find principles acceptable to all by setting out a unified framework which honours the liberal principles of respect for diversity a robust liberal political theory capable of dealing with diverse forms of disagreement and even some forms of radical dissent is achieved

Cultured Meat to Secure Our Future

2022-02-28

original essays on the promise of cultivated meat the bioengineering of

animal flesh from cultivated animal cells in 2013 mark post a pharmacologist and professor of vascular physiology at maastricht university in the netherlands introduced to the world s press a meat patty made from animal cells since that time the possibility that we may within a decade be able to cultivate animal cells at scale to create meat without killing an animal or utilizing animal parts has drawn the attention of life scientists investors and companies all of whom are working to produce pork beef fish shrimp and other meat products without the waste cruelty greenhouse gases or land use change of conventional animal agriculture cultivated meat to secure our future is the first volume to highlight the voices of some of the entrepreneurs scientists and market research specialists from around the world who are leading the charge to revolutionize what and how we consume meat and dairy in the coming decades this book is produced in collaboration with gaia or global action in the interest of animals which unites defenders of animal welfare and advocates for human rights in belgium

Saving Animals, Saving Ourselves

2022

in 2020 covid 19 the australia bushfires and other global threats served as vivid reminders that human and nonhuman fates are increasingly linked human use of nonhuman animals contributes to pandemics climate change and other global threats which in turn contribute to biodiversity loss ecosystem collapse and nonhuman suffering jeff sebo argues that humans have a moral responsibility to include animals in global health and environmental policy in particular we should reduce our use of animals as part of our pandemic and climate change mitigation efforts and increase our support for animals as part of our adaptation efforts applying and extending frameworks such as one health and the green new deal sebo calls for reducing support for factory farming deforestation and the wildlife trade increasing support for humane healthful and sustainable alternatives and considering human and nonhuman needs holistically sebo also considers connections with practical issues such as education employment social services and infrastructure as well as with theoretical issues such as well being moral status political status and population ethics in all cases he shows that these issues are both important and complex and that we should neither underestimate our responsibilities because of our limitations nor underestimate our limitations because of our responsibilities both an urgent call to action and a survey of what ethical and effective action requires saving animals saving ourselves is an invaluable resource for scholars advocates policy makers and anyone interested in what kind of world we should attempt to build and how

Animals and Public Health

2012-02-14

a compelling argument of how human health is adversely affected by our poor treatment of non human animals the author contents that in order to successfully confront the 21st century s health challenges we need to broaden the definition of the word public in public health to include non human

animals

Neuroethics and Nonhuman Animals

2020-03-06

this edited volume represents a unique addition to the available literature on animal ethics animal studies and neuroethics its goal is to expand discussions on animal ethics and neuroethics by weaving together different threads philosophy of mind and animal minds neuroscientific study of animal minds and animal ethics neuroethical questions concerning animals moral status animal minds and consciousness animal pain and the adequacy of animal models for neuropsychiatric disease have long been topics of debate in philosophy and ethics and more recently also in neuroscientific research the book presents a transdisciplinary blend of voices underscoring different perspectives on the broad questions of how neuroscience can contribute to our understanding of nonhuman minds and on debates over the moral status of nonhuman animals all chapters were written by outstanding scholars in philosophy neuroscience animal behavior biology neuroethics and bioethics and cover a range of issues and species taxa given its scope the book will appeal to scientists and students interested in the debate on animal ethics while also offering an important resource for future researchers chapter 13 is available open access under a cc by 4.0 license at link.springer.com

Food, Justice, and Animals

2023-03-21

how would we eat if animals had rights a standard assumption is that our food systems would be plant based but maybe we should reject this assumption indeed this book argues that a future non vegan food system would be permissible on an animal rights view it might even be desirable in food justice and animals feeding the world respectfully josh milburn questions if the vegan food system risks cutting off many people's pursuit of the good life risks exacerbating food injustices and risks negative outcomes for animals if so then maybe non vegan food systems would be preferable to vegan food systems if they could respect animal rights could they the author provides a rigorous analysis of the ethics of farming invertebrates producing plant based meats developing cultivated animal products and co working with animals on genuinely humane farms arguing that these possibilities offer the chance for a food system that is non vegan but nonetheless respects animals rights he argues that there is a way for us to have our cake and eat it too because we can have our cow and eat her too

Animals as Persons

2008-06-17

a prominent and respected philosopher of animal rights law and ethical theory gary l francione is known for his criticism of animal welfare laws and regulations his abolitionist theory of animal rights and his promotion of

veganism and nonviolence as the baseline principles of the abolitionist movement in this collection francione advances the most radical theory of animal rights to date unlike peter singer francione maintains that we cannot morally justify using animals under any circumstances and unlike tom regan francione s theory applies to all sentient beings not only to those who have more sophisticated cognitive abilities

Cool Careers Without College for People Who Love Animals

2013-12-15

from working with dogs to horses to elephants there is a job out there for every person who loves working with animals and the ones in this volume don t require college giving readers all the tools they need to begin a career working with animals this text is filled with exciting and colorful animal photos informative sidebars and some information from individuals who work with animals in real life it covers résumés cover letters job searches and giving a good interview as well

The Moral Rights of Animals

2016-03-16

edited by mylan engel jr and gary lynn comstock this book employs different ethical lenses including classical deontology libertarianism commonsense morality virtue ethics utilitarianism and the capabilities approach to explore the philosophical basis for the strong animal rights view which holds that animals have moral rights equal in strength to the rights of humans while also addressing what are undoubtedly the most serious challenges to the strong animal rights stance including the challenges posed by rights nihilism the kind argument against animal rights the problem of predation and the comparative value of lives in addition contributors explore the practical import of animal rights both from a social policy standpoint and from the standpoint of personal ethical decisions concerning what to eat and whether to hunt animals unlike other volumes on animal rights which focus primarily on the legal rights of animals and unlike other anthologies on animal ethics which tend to cover a wide variety of topics but only devote a few articles to each topic this volume focuses exclusively on the question of whether animals have moral rights and the practical import of such rights the moral rights of animals will be an indispensable resource for scholars teachers and students in the fields of animal ethics applied ethics ethical theory and human animal studies as well as animal rights advocates and policy makers interested in improving the treatment of animals

Religion Without God and God Without Religion

1885

in an ever changing interconnected world the agriculture and food system

faces constant challenges in many forms such as the impacts of climate change uncertainty surrounding the use of novel technologies and the emergence of new zoonotic diseases alongside these challenges professionals working in the food system are faced with opportunities to improve food production and distribution as decision makers attempt to balance these threats and opportunities in order to secure more sustainable production systems the key question that arises is what do we envisage as the future for agriculture and food production with numerous voices advocating different and sometimes conflicting approaches ranging from organic farming to wider use of gmos through in vitro meat production this discussion of the future raises significant ethical questions the contributions in this book bring together a diverse group of authors who explore a set of themes relating to the ethical dimensions of the agriculture and food futures including the role of novel technologies the potential issues raised by the use of biofuels the ethics of future animal production systems concepts of global food security as well as chapters on food governance priorities and educational aspects it is intended that this volume serves as an interesting collection and acts as a source of stimulation that will contribute to wider debate and reflection on the future of the agriculture and food system

Ethical futures: bioscience and food horizons

2023-09-04

questioning our conflicting views of the role of animals

Regarding Animals

1996-06-14

human animal studies is an interdisciplinary field that explores the spaces that animals occupy in human social and cultural worlds it examines the interactions humans and animals have with each other and the ways animal lives intersect with human societies since existing social orders rely on the exploitation of animals to serve human needs the questions posed by human animal studies touch upon a wide range of fundamental issues animals and society provides a broad overview of this rapidly growing field margo demello offers students and scholars a holistic and comprehensive picture of the state of inquiry into the relationships that exist between humans and other animals she considers interactions between animals and humans in social organizations such as the family the legal system and political and religious institutions a major focus is the social construction of animals in world cultures and the way in which these social meanings are used to reinforce and perpetuate hierarchical human relationships such as racism sexism and class privilege the book also examines how different human groups construct a range of identities for themselves and for others through animals this second edition of animals and society is fully updated and expanded throughout enhancing the book s relevance for student and activist readers alike it includes many new international examples all new case studies and updated supplementary readings

Animals and Society

2021-04-13

the ethics and rhetoric of invasion ecology provides an introduction to the controversial treatment and ongoing violence routinely utilized against non native species drawing from the tradition of critical animal scholars stanescu and cummings have assembled a group of advocates who argue for a different kind of relationship with foreign species where contemporary approaches often emphasize the need to eradicate ecological invaders in order to preserve delicate habitats the essays in this volume aim to reformulate the debate by arguing for an alternative approach that advances the possibility of an ethics of co habitation

The Ethics and Rhetoric of Invasion Ecology

2016-10-26

seeing a cat rubbing against a person charles darwin described her as in an affectionate frame of mind for samuel barnett a behaviorist the mental realm is beyond the grasp of scientists and behavior must be described technically as a physical action only what difference does this difference make in eileen crist s analysis of the language used to portray animal behavior the difference is that in the reader s mind the very image of the cat s body is transfigured from an experiencing subject into a vacant object images of animals examines the literature of behavioral science revealing how works with the common aim of documenting animal lives habits and instincts describe realities that are worlds apart whether the writer affirms the cartesian verdict of an unbridgeable chasm between animals and humans or the darwinian panorama of evolutionary continuity the question of animal mind is ever present and problematic in behavioral thought comparing the naturalist writings of charles darwin jean henri fabre and george and elizabeth peckham to works of classical ethology by konrad lorenz and nikolaas tinbergen and of contemporary sociobiology crist demonstrates how words matter she does not attempt to defend any of these constructions as a faithful representation of animal existence but to show how each internally coherent view molds the reader s understanding of animals rejecting the notion that a neutral language exists or can be constructed which yields incontestably objective accounts of animal behavior crist argues that language is not instrumental in the depiction of animals and in particular it is never impartial with respect to the question of animal mind

Proceedings of the First International Medical Conference "Future Medical Research Without the Use of Animals-- Facing the Challenge

1990

thinking bees ice skating buffaloes dreaming rats happy foxes ecstatic elephants despondent dolphins in minding animals marc bekoff takes us on an

exhilarating tour of the emotional and mental world of animals where we meet creatures who do amazing things and whose lives are filled with mysteries following in the footsteps of konrad lorenz and niko tinbergen bekoff has spent the last 30 years studying animals of every stripe from coyotes in wyoming to penguins in antarctica he draws on this vast experience as well as on the observations of other naturalists to offer readers fascinating stories of animal behavior including grooming and gossip self medication feeding patterns dreaming dominance and mating behavior many of these stories are truly incredible chimpanzees medicating themselves with herbal remedies elephants clearly mourning a dead group member but this is not simply a catalog of amazing animal tales for bekoff also sheds light on many of the more serious issues surrounding animals he offers a thought provoking look at animal cognition intelligence and consciousness and he presents vivid examples of animal passions highlighting the deep emotional lives of our animal kin all this serves as background for his thoughtful conclusions about humility and animal protection and animal well being where he urges a new paradigm of respect grace compassion and love for all animals marc bekoff has gone deep into the minds hearts spirits and souls of animals giving him profound insight into their lives and no small insight into ours minding animals is an important contribution to our understanding of animal consciousness a major work that will be a must read for anyone who loves nature

Images Of Animals

2000-04-19

there are complex often surprising connections between our imagining of animals our cultural environment topics discussed in this collection include fox hunting pet cloning animatronic characters how we displace our fear of aging onto our dogs

Minding Animals

2002-05-02

this book is an interdisciplinary study centred on the political and legal position of animals in liberal democracies with due concern for both animals and the sustainability of liberal democracies the open society and its animals seeks to redefine animals political legal position in the most successful political model of our time advancements in modern science point out that many animals are sentient and that like humans they have certain elementary interests the revised perception of animals as beings with elementary interests raises questions concerning the liberal democratic institutional framework does a liberal democracy have a responsibility towards the animals on its territory and if so what kind do animals need legal animal rights and lawyers to represent them in court and should they also be represented in parliament and how much change of this kind could a liberal democracy really endure vink addresses these and other pressing questions relating to the political and legal position of animals in this persuasive and authoritative work compelling us to reconsider the

relationship between the open society and the animals in it

Representing Animals

2002-11-28

polymer composites derived from animal sources presents a systematic review of recent developments in this important research field the book provides a thorough introduction to the various types of animal based material resources currently available and discusses their morphology extraction process sustainability formation properties and applications emphasis is placed on applications of polymer composites derived from wool silk chicken bovine marine life and animal waste different types of processing techniques are discussed in detail as well as chemical modification interfacial adhesion and the structure property relationship the book will be a valuable reference resource for academic and industrial researchers and materials scientists and engineers working on the research and development of natural based composites derived from animal sources provides a comprehensive reference on the preparation and applications of high performance polymer composites derived from animal sources covers materials selection design solutions manufacturing techniques characterization structural analysis and performance for various applications includes extraction methods surface treatment and modification and fabrication methods focuses on economic and environmental aspects

The Open Society and Its Animals

2020-07-10

this thought provoking book will ask what it is to be human what to be animal and what are the natures of the relationships between them this is accomplished with philosophical and ethical discussions scientific evidence and dynamic theoretical approaches attitudes to animals will also encourage us to think not only of our relationships to non human animals but also of those to other human animals this book provides a foundation that the reader can use to make ethical choices about animals it will challenge readers to question their current views attitudes and perspectives on animals nature and development of the human animal relationship human perspectives on the human animal relationships reflect what we have learned together with spoken and unspoken attitudes and assumptions from our families societies media education and employment

Homes without hands, a description of the habitations of animals

1865

the climate crisis and other animals is a must read for anyone who cares about the future of our planet and the animals who live on it twine examines the impact of the climate crisis on nonhuman animals and argues for the importance of a climate and food justice movement inclusive of nonhuman

animals the book examines the ways in which climate breakdown is affecting nonhuman animal species and delves deeply into the politicised controversy over the extent of emissions from animal agriculture demonstrating the markedly lower emissions of eating vegan critical of misguided human centred framings of the climate crisis twine makes clear the necessity of including practices of animal commodification the importance of documenting the effect of a changing climate on other animal species and the mitigative opportunities of a radical remaking of dominant human animal relations the climate crisis and other animals addresses the emissions impacts of radical land use changes and the twentieth century scaling up of animal commodification within the animal industrial complex revealing how this system is interwoven in the gendered and racialised histories of capitalism twine collates an impressive body of scientific research that demonstrate both the already enormous impact of the climate crisis on the lives of nonhuman animals and the need to tackle the dominance of meat based cultures twine critically explores approaches to food transition and three potentially transformative scenarios for global food systems that could help dismantle the animal industrial complex and create a more sustainable and just food system averting the climate and biodiversity crises requires nothing less than a radical transformation in how we see ourselves in relation to other species

Polymer Composites Derived from Animal Sources

2024-04-10

based in extensive research in geology atmospheric science and paleontology this book offers a detailed history of co2 in the atmosphere and an understanding of factors that have influenced changes in the past the text illuminates the role of atmospheric co2 in the modern carbon cycle and in the evolution of plants and animals and addresses the future role of atmospheric co2 and its likely effects on ecosystems

Homes Without Hand Being a Description of the Habitations of Animals, Classed According to Their Principle of Construction by the Rev. J. G. Wood

1865

in evolutionary worlds without end henry plotkin considers whether there is any general theory in biology including the social sciences that is in any way equivalent to the general theories of physics he starts by examining ernest rutherford s dictum as to what science is in the later chapters he considers the possibility within an historical framework of a general theory being based upon selection processes

Attitudes to Animals

1999-02-13

in many people's eyes the ability for animals to be able to behave naturally is essential for their welfare however animals do not necessarily want to do behaviour just because it is natural or is seen in wild animals being chased by a predator is not necessarily good for welfare natural behaviour is important because it gives us a baseline for what animals might want to do but it cannot define good welfare on its own it has to be validated in exactly the same way as other behavioural correlates of welfare as either contributing to health or being what the animals want to do

The Climate Crisis and Other Animals

2024-03-01

the term anthropocene the era of mankind is increasingly being used as a scientific designation for the current geological epoch this is because the human species now dominates ecosystems worldwide and affects nature in a way that rivals natural forces in magnitude and scale thinking about animals in the age of the anthropocene presents a dozen chapters that address the role and place of animals in this epoch characterized by anthropogenic human made environmental change while some chapters describe our impact on the living conditions of animals others question conventional ideas about human exceptionalism and stress the complex cognitive and other abilities of animals the anthropocene idea forces us to rethink our relation to nature and to animals and to critically reflect on our own role and place in the world as a species nature is not what it was nor are the lives of animals as they used to be before mankind's rise to global ecological prominence can we eventually learn to live with animals rather than causing extinction and ecological mayhem

A History of Atmospheric CO2 and Its Effects on Plants, Animals, and Ecosystems

2005-07-28

reproduction of the original

Fish and Wildlife Miscellaneous

1976

this volume of case studies on animal ethics deals with important social controversies involving the human use of animals and analyzes the moral issues involved an introduction to ethical theory provides a framework to the 16 original case studies which include the use of animals in research testing and education as food as companion animals and in religious rites the book is intended for bioethics courses and animal career staff

Evolutionary Worlds Without End

2010

food animals and the environment an ethical approach examines some of the main impacts that agriculture has on humans nonhumans and the environment as well as some of the main questions that these impacts raise for the ethics of food production consumption and activism agriculture is having a lasting effect on this planet some forms of agriculture are especially harmful for example industrial animal agriculture kills 100 billion animals per year consumes vast amounts of land water and energy and produces vast amounts of waste pollution and greenhouse gas emissions other forms such as local organic and plant based food have many benefits but they also have many costs especially at scale these impacts raise difficult ethical questions what do we owe animals plants species and ecosystems what do we owe people in other nations and future generations what are the ethics of risk uncertainty and collective harm what is the meaning and value of natural food in a world reshaped by human activity what are the ethics of supporting harmful industries when less harmful alternatives are available what are the ethics of resisting harmful industries through activism advocacy and philanthropy the discussion ranges over cutting edge topics such as effective altruism abolition and regulation revolution and reform individual and structural change single issue and multi issue activism and legal and illegal activism this unique and accessible text is ideal for teachers students and anyone else interested in serious examination of one of the most complex and important moral problems of our time

The Acclimatisation of ... Animals and Plants, Being a Paper Read Before the Philosophical Society

1862

maggie graham was born in liverpool in 1950 her love of animals was instilled into her almost from birth in 1969 she became the youngest stewardess to be employed by caledonian airways after spending some time in mount gambier south australia she returned to the uk where she qualified as a dental hygienist with the army in aldershot she has lived up and down the country and has now done full circle returning to her roots she lives in north liverpool with her third husband trevor and coco and mia her two dogs
