Fundamentals of Corporate Finance

2008

Executive summary of the book 'Fundamentals of Corporate Finance' by Ross, Westerfield, and Jaffe. The book covers the modern fundamentals of the theory of finance while providing contemporary examples to make the theory come to life. The authors present corporate finance as the working of a small number of integrated and powerful intuitions rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The twelfth edition includes many exciting new research findings as well as the
