Journal of the National Cancer Institute

1995

from the reviews astronomy and astrophysics abstracts has appeared in semi annual volumes since 1969 and it has already become one of the fundemental publications in the fields of astronomy astrophysics and neighbouring sciences it is the most important english language abstracting journal in the mentioned branches the abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the whole extended material the aaa is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences as such it represents a necessary ingredient of any astronomical library all over the world space science review dividing the whole field plus related subjects into 108 categories each work is numbered and most are accompanied by brief abstracts fairly comprehensive cross referencing links relevant papers to more than one category and exhaustive author and subject indices are to be found at the back making the catalogues easy to use the series appears to be so complete in its coverage and always less than a year out of date that i shall certainly have to make a little more space on those shelves for future volumes the observatory magazine

Journal of the National Cancer Institute

1995

temporal information systems in medicine introduces the engineering of information systems for medically related problems and applications the chapters are organized into four parts fundamentals temporal reasoning maintenance in medicine time in clinical tasks and the display of time oriented clinical information the chapters are self contained with pointers to other relevant chapters or sections in this book when necessary time is of central importance and is a key component of the engineering process for information systems this book is designed as a secondary text or reference book for upper undergraduate level students and graduate level students concentrating on computer science biomedicine and engineering industry professionals and researchers working in health care management information systems in medicine medical informatics database management and ai will also find this book a valuable asset

Fort Lauderdale Hollywood International Airport

2008

august 8 12 1994 brighton england from animals to animats 3 brings together research intended to advance the fron tier of an exciting new approach to understanding intelligence the contributors represent a broad range of interests from artificial intelligence and robotics to ethology and the neurosciences unifying these approaches is the notion of animat an artificial animal either simulated by a computer or embodied in a robot which must survive and adapt in progressively more challenging environments the 58 contributions focus particularly on well defined models computer simulations and built robots in order to help characterize and compare various principles and architectures capable of inducing adaptive behavior in real or artificial animals topics include individual and collective behavior neural correlates of behavior perception and motor control motivation and emotion action selection and behavioral sequences ontogeny learning and evolution internal world models and cognitive processes applied adaptive behavior autonomous robots heirarchical and parallel organizations emergent structures and behaviors problem solving and planning goal directed behavior neural networks and evolutionary computation characterization of environments a bradford book

Literature 1989, Part 1

the built environment has been digitizing rapidly and is now transforming into a physical world that is at all times supplemented by a fully web supported and interconnected digital version often referred to as digital twin this book shows how diverse data models and web technologies can be created and used for the built environment key features of this book are its technical nature and technical detail the first part of the book highlights a large diversity of it techniques and their use in the aec domain from json to xml to express to rdf owl for modelling geometry products properties sensor and energy data the second part of the book focuses on diverse software solutions and approaches including digital twins federated data storage on the web iot cloud computing and smart cities key research and strategic development opportunities are comprehensively discussed for distributed web based building data management iot integration and cloud computing this book aims to serve as a guide and reference for experts and professionals in aec computing and digital construction including master s students phd researchers and junior to senior it oriented aec professionals

General Extension Division Bulletin

1957

software engineering requires specialized knowledge of a broad spectrum of topics including the construction of software and the platforms applications and environments in which the software operates as well as an understanding of the people who build and use the software offering an authoritative perspective the two volumes of the encyclopedia of software engineering cover the entire multidisciplinary scope of this important field more than 200 expert contributors and reviewers from industry and academia across 21 countries provide easy to read entries that cover software requirements design construction testing maintenance configuration management quality control and software engineering management tools and methods editor phillip a laplante uses the most universally recognized definition of the areas of relevance to software engineering the software engineering body of knowledge swebok as a template for organizing the material also available in an electronic format this encyclopedia supplies software engineering students it professionals researchers managers and scholars with unrivaled coverage of the topics that encompass this ever changing field also available online this taylor francis encyclopedia is also available through online subscription offering a variety of extra benefits for researchers students and librarians including citation tracking and alerts active reference linking saved searches and marked lists html and pdf format options contact taylor and francis for more information or to inquire about subscription options and print online combination packages us tel 1 888 318 2367 e mail e reference taylorandfrancis com international tel 44 0 20 7017 6062 e mail online sales tandf co uk

Essential Songwriting

2006

for more than half a century the theory of continental drift was widely derided innovators developing the radical theory were labelled as unscientific by well known science authorities but then in the space of a few years virtually all opposition dramatically collapsed continental drift transformed into plate tectonics and became widely acknowledged as one of the most profound scientific revolutions of the twentieth century yet a number of science innovators who had been closely involved with creating this new theory of the earth continued to research an even more radical theory they saw evidence that the new geological theory was incomplete arguing that continental drift was caused by the earth expanding in size these science innovators give us a unique insight into their experiences they relate their personal histories of earth expansion in 14 original essays the hidden history of earth expansion presents the unique personal histories of british american australian german polish romanian indian albanian and jamaican science innovators as they strived to produce a modern theory of the earth it includes chapters expressly written for the book by some of the most well known researchers into earth expansion hugh g owen cliff ollier karl heinz jacob james maxlow jan koziar stefan cwojdziñski carl strutinski stephen w hurrell john b eichler william c erickson david noel zahid a khan ram chandra tewari vedat shehu and richard guy in addition to furnishing us with their personal histories of earth expansion and the seemingly overwhelming evidence for its confirmation the authors highlight areas where further research is required

Craftsmen of the Army

1970

the increased use of technology is necessary in order for industrial control systems to maintain and monitor industrial infrastructural or environmental processes the need to secure and identify threats to the system is equally critical securing critical infrastructures and critical control systems approaches for threat protection provides a full and detailed understanding of the vulnerabilities and security threats that exist within an industrial control system this collection of research defines and analyzes the technical procedural and managerial responses to securing these systems

Temporal Information Systems in Medicine

2010-05-25

semiannual with semiannual and annual indexes references to all scientific and technical literature coming from doe its laboratories energy centers and contractors includes all works deriving from doe other related government sponsored information and foreign nonnuclear information arranged under 39 categories e g biomedical sciences basic studies biomedical sciences applied studies health and safety and fusion energy entry gives bibliographical information and abstract corporate author subject report number indexes

includes entries for maps and atlases

From Animals to Animats 3

1994

the objective of the series has always been to provide a forum in which leading contributors to an area can write about significant bodies of research in which they are involved the operating procedure has been to invite contributions from interesting active investigators and then allow them essentially free rein to present their perspectives on important research problems the result of such invitations over the past two decades has been collections of papers which consist of thoughtful integrations providing an overview of a particular scientific problem the series has an excellent tradition of high quality papers and is widely read by researchers in cognitive and experimental psychology

Buildings and Semantics

with the prevalence of cyber crime and cyber warfare software developers must be vigilant in creating systems which are impervious to cyber attacks thus security issues are an integral part of every phase of software development and an essential component of software design security aware systems applications and software development methods facilitates the promotion and understanding of the technical as well as managerial issues related to secure software systems and their development practices this book targeted toward researchers software engineers and field experts outlines cutting edge industry solutions in software engineering and security research to help overcome contemporary challenges

Encyclopedia of Software Engineering Three-Volume Set (Print)

2010-11-22

the objective of the nato advanced research workshop learning electricity and electronics with advanced educational technology was to bring together researchers coming from different domains electricity education is a domain where a lot of research has already been made the first meeting on electricity teaching was organized in 1984 by r duit w jung and c von rhoneck in ludwigsburg germany since then research has been going on and we can consider that the workshop was the successor of this first meeting our goal was not to organize a workshop grouping only people producing software in the field of electricity education or more generally in the field of physics education even if this software was based on artificial intelligence techniques on the contrary we wanted this workshop to bring together researchers involved in the connection between cognitive science and the learning of a well defined domain such as electricity so during the workshop people doing research in physics education cognitive psychology and artificial intelligence had the opportunity to discuss and exchange these proceedings reflect the different points of view the main idea is that designing a learning environment needs the confrontation of different approaches the proceedings are organized in five parts which reflect these different aspects

The Hidden History of Earth Expansion

2020-05-14

these proceedings contain the papers presented at the advanced research working conference on correct hardware design methodologies held in arles france in may 1993 and organized by the esprit working group 6018 charme 2and the universit de provence marseille in cooperation with ifip working group 10 2 formal verification is emerging as a plausible alternative to exhaustive simulation for establishing correct digital hardware designs the validation of functional and timing behavior is a major bottleneck in current vlsi design systems slowing the arrival of products in the marketplace with its associated increase in cost from being a predominantly academic

area of study until a few years ago formal design and verification techniques are now beginning to migrate into industrial use as we are now witnessing an increase in activity in this area in both academia and industry the aim of this working conference was to bring together researchers and users from both communities

Interstate Certified Shellfish Shippers List

1994

this book provides an overview of current hardware security primitives their design considerations and applications the authors provide a comprehensive introduction to a broad spectrum digital and analog of hardware security primitives and their applications for securing modern devices readers will be enabled to understand the various methods for exploiting intrinsic manufacturing and temporal variations in silicon devices to create strong security primitives and solutions this book will benefit soc designers and researchers in designing secure reliable and trustworthy hardware provides guidance and security engineers for protecting their hardware designs covers a variety digital and analog hardware security primitives and applications for securing modern devices helps readers understand puf trngs silicon odometer and cryptographic hardware design for system security

Securing Critical Infrastructures and Critical Control Systems: Approaches for Threat Protection

2012-12-31

advances in imaging electron physics merges two long running serials advances in electronics electron physics and advances in optical electron microscopy the series features extended articles on the physics of electron devices especially semiconductor devices particle optics at high and low energies microlithography image science and digital image processing electromagnetic wave propagation electron microscopy and the computing methods used in all these domains

Energy Research Abstracts

1994

literary market place 2001 is the ultimate insider s guide to the u s book publishing industry covering every conceivable aspect of the business in two easy to use volumes it provides 50 sections organizing everyone and everything in the business from publishers agents and ad agencies to associations distributors and events over 14 500 listings in all featuring names addresses and numbers key personnel activities specialties and other relevant data e mail addresses and sites and more some 24 000 decision makers throughout the industry listed in a separate personnel yellow pages section in each volume thousands of services and suppliers equipped to meet every publishing need or requirement more than 400 new entries to this edition plus thousands of updated listings throughout lmp 2001 leaves no stone unturned in connecting you with the publishing firm service or product you or your patrons need it s completely revised and updated to help publishers locate other publishers free lancers agents printers wholesalers manufacturers and more suppliers find names and numbers of potential publishing customers job seekers locate contact names addresses and phone numbers throughout the industry booksellers get publisher ordering and shipping information writers locate publishers for their works librarians provide patrons with the reference source they need to find their way through the publishing industry

National Union Catalog

1982

cognitive and computational strategies for word sense disambiguation examines cognitive strategies by humans and computational strategies by machines for wsd in parallel focusing on a psychologically valid property of words and senses author oi yee kwong discusses their concreteness or abstractness and draws on psycholinguistic data to examine the extent to which existing lexical resources resemble the mental lexicon as far as the concreteness distinction is concerned the text also investigates the contribution of different knowledge sources to wsd in relation to this very intrinsic nature of words and senses

Mental Health Directory

1995

a timely book containing foundations and current research directions on emotion recognition by facial expression voice gesture and biopotential signals this book provides a comprehensive examination of the research methodology of different modalities of emotion recognition key topics of discussion include facial expression voice and biopotential signal based emotion recognition special emphasis is given to feature selection feature reduction classifier design and multi modal fusion to improve performance of emotion classifiers written by several experts the book includes several tools and techniques including dynamic bayesian networks neural nets hidden markov model rough sets type 2 fuzzy sets support vector machines and their applications in emotion recognition by different modalities the book ends with a discussion on emotion recognition in automotive fields to determine stress and anger of the drivers responsible for degradation of their performance and driving ability there is an increasing demand of emotion recognition in diverse fields including psycho therapy bio medicine and security in government public and private agencies the importance of emotion recognition has been given priority by industries including hewlett packard in the design and development of the next generation human computer interface hci systems emotion recognition a pattern analysis approach would be of great interest to researchers graduate students and practitioners as the book offers both foundations and advances on emotion recognition in a single volume provides a thorough and insightful introduction to the subject by utilizing computational tools of diverse domains inspires young researchers to prepare themselves for their own research demonstrates direction of future research through new technologies such as microsoft kinect eeg systems etc
